30 Development Strategy

# OVERVIEW OF BEIJING

Beijing, the capital of the People's Republic of China, is a pivotal hub for the nation's politics, culture, international exchange, and technological innovation. Leading in multiple strategic emerging industries both domestically and globally, Beijing boasts abundant resources in technology, finance, culture, talent, and international connectivity. It is rapidly emerging as a global leader in scientific and technological innovation, a high-end economic growth engine, and a top destination for innovative minds.

2025 marks the final year of the 14th Five-Year Plan and a pivotal year for laying a solid foundation for the 15th Five-Year Plan. Guided by the vision of capital development in the new era, Beijing is deeply implementing the strategies of Humanistic Beijing, Technological Beijing, and Green Beijing, as well as the coordinated development in the Beijing-Tianjin-Hebei region. It adheres to the "Five Initiatives" linkage service and integrates into the new development pattern in order to promote high-quality development. Beijing is unwaveringly promoting the high-level reform and opening-up, giving full play to the advantages of the pilot policies adopted in the "Two Zones" and Zhongguancun Science Park, deepening institutional and mechanism innovation, and continuously injecting dynamism and vitality into modernization drive.

Embracing the principles of innovation, coordination, greenness, openness and sharing, Beijing is creating boundless opportunities for investors and businesses.

## » **Opening-up at a higher level**

### **Steady progress in the "Two Zones" construction**

**The construction of the "Two Zones," namely the National Comprehensive Demonstration Zone for Expanding and Opening-up of the Service Sector and the China (Beijing) Pilot Free Trade Zone, represents two major policies approved by the central government to support Beijing's development.**

Currently, Beijing is accelerating the implementation of a new round of plans for the National Comprehensive Demonstration Zone for Expanding and Opening-up of the Service Sector, taking the lead in rolling out a series of high-value reform and opening-up measures, and pioneering a set of "Beijing Experiences" in institutional opening-up in areas such as investment and trade facilitation, and international factor supply. It is deeply elevating the China (Beijing) Pilot Free Trade Zone, striving to build the Beijing Free Trade brand characterized by "Innovation, Digital Intelligence, Green Development, Convenience, and Synergy," and driving key parks (clusters) to implement the three-year action plan, thus ensuring differentiated and distinctive development, and boosting the internationalization level of the Central Business District (CBD).

- Approved to pilot the expansion of opening-up in sectors such as value-added telecommunications and healthcare, and has established **China's first** foreign-invested enterprise in human gene diagnosis and treatment technology.
- Release **China's first** scenario-based, field-level negative list for cross-border data transfer in its pilot free trade zone, while establishing a "green channel" mechanism for streamlined security assessment filings by foreign-invested enterprises.
- Released a recognition catalog covering **149** international professional qualifications.
- Established the Beijing International Dispute Resolution Development Center.
- Beijing CBD elected as the new President of the Global Business Districts (GBD) Innovation Club.

Beijing Tianzhu Comprehensive Bonded Zone
Ranked second in the 2023 National Comprehensive Bonded Zone Development Performance Evaluation, accelerating the construction of a pilot zone for rare disease drug security.
Beijing Daxing International Airport Comprehensive Bonded Zone
The second phase passed the acceptance and the fence acceptance was completed in the entire area
Beijing Zhongguancun Comprehensive Bonded Zone
China's first bonded zone without physical barriers
Beijing Yizhuang Comprehensive Bonded Zone
Approved for establishment, and plans to build China's first bonded zone dedicated to fostering new quality productive forces

### Expanding influence of the “Four Platforms”

Beijing has successfully organized the China International Fair for Trade in Services (CIFTIS), Zhongguancun Forum, Beijing Culture Forum, and Financial Street Forum at a high level, deepening multi-level and multi-field exchanges and cooperation both domestically and internationally, continuously improving the quality and efficiency of investment attraction, and consolidating and expanding the outcomes of these events.

China International Fair for Trade in Services (CIFTIS)	Zhongguancun Forum
International exhibitor participation exceeded <b>20%</b> .	<b>29</b> major scientific and technological achievements unveiled; <b>over 300</b> projects signed.
Beijing Culture Forum	Financial Street Forum
Held the inaugural Cultural Industry Investors Conference.	Strengthened its role as a bellwether for China's financial reform and development.

### 2025: Advancing toward a higher-level open economy

- Effectively implement the Regulation of Beijing Municipality on Foreign Investment, align with international high-standard economic and trade rules, steadily expand institutional opening-up, and enhance the quality of foreign investment utilization and the level of trade and investment liberalization

and facilitation.

- Deepen high-quality Belt and Road cooperation.
- Improve the working mechanisms for high-quality Belt and Road cooperation, enhance economic exchanges with partner countries, and promote the global expansion of "Beijing Innovation" and "Beijing Services."

## » Remarkable achievements in optimizing the business environment

### The Regulation of Beijing Municipality on Optimizing Doing Business Environment has been revised.

Completed **413** annual reform tasks, reinforcing the "Beijing Services" brand.

Annual new market entities

**315,000**

New enterprises:

**265,000**

- Launched **112** "one-stop government services" scenarios, expanded use of specialized credit reports to replace no-violation certificates to **42** fields, and established "case-by-case" approval coordination.
- Off-site inspection items increased to **4,833**, accounting for **77.6%** of total.
- Scan-and-check initiation rate at all levels is **100%**; enterprises may refuse inspections without code scanning.

#### Government services

Achieved citywide **24-hour self-service coverage**

#### 12345 Enterprise Service Hotline

Handled **255,000** enterprise requests, with a resolution rate of **97.5%**

#### Jingce Platform

Launched **773** cashable policy items benefiting enterprises

#### "Service Package" System

Resolved over **57,000** enterprise requests

#### "One-Stop Declaration" and Result Sharing

Pioneered credit restoration in certain areas for bankrupt and reorganized enterprises

#### "Policy Talks by Bureau and Division Chiefs" launched

**China's first** Business Environment Policy Dialogue Program

## 2025: Comprehensive optimization of the business environment

Beijing will implement the Regulation of Beijing Municipality on Optimizing the Business Environment, prioritizing stakeholder satisfaction while benchmarking advanced rules and best practices. It will combine top-down and bottom-up approaches to formulate new reform initiatives, improve legal governance mechanisms, and strive for world-class "Beijing Services" that set the highest standards.

### » **Steady improvement in the service industry quality development**

- In 2024, the combined effects of macro policies continued to emerge, and the service industry operated stably overall. Key fields played a solid supporting role, with steady improvements in development quality, providing significant support for the stable operation of the city's economy. Beijing completed **152** tasks of the 2.0 Plan for the Construction of National Comprehensive Demonstration Zone for Expanding and Opening-up of the Service Sector within just over a year, with an implementation rate exceeding **86%**.
- In 2025, Beijing will formulate the 3.0 Plan and develop implementation measures for the strategy on upgrading the China (Beijing) Pilot Free Trade Zone.

### » **Financial innovation leading high-quality development**

#### **Beijing leads in multiple green finance indicators**

- In 2024, Beijing completed the reform of the financial management system at the city and district levels, innovatively creating **3 major online platforms** for global financial services, financial think tanks, and high-end professional service institutions, **6 basic platforms** such as Financial Salon and Financial Dialogue, and **multiple specialized platforms** such as the Financing Facilitation Project and Diamond Initiative.
- Promoted the pilot implementation of equity investments by financial asset investment companies in Beijing, with the subscribed scale and implemented projects ranking among the **top in China**.
- Supported the Beijing Green Exchange in establishing China's unified voluntary greenhouse gas reduction trading center, while maintaining Beijing's **national leadership** in green credit and green bond scales.
- Established a coordination mechanism to support financing for small and micro-enterprises, keeping financing costs at historic lows.
- Accelerated the development of the third-pillar pension insurance and long-term care insurance, with the number of personal pension accounts and the scale of deposited funds ranking among the **top** in national pilot cities.

- Enhanced the multi-tier capital market system, hosting over **800** domestic and overseas listed companies hosting over 800 domestic and overseas listed companies, ranking first nationwide. The Beijing Regional Equity Market was approved for institutional and business innovation pilots, with direct financing scale **ranking first nationwide**.
- Advanced the "Two Zones" initiative in finance, facilitating the establishment of key institutions like BNP Paribas China joint venture insurer, achieving multiple **national firsts**.
- Took the lead in creating demonstration zones for payment services for foreign visitors at the two major international airports, pioneering the use of contactless foreign cards for public transportation, significantly enhancing payment convenience for foreigners visiting China.

Beijing's financial sector in 2024 focused on meeting the development needs of new quality productive forces and advanced more substantial opening-up.		
52 major domestic and foreign financial institutions established operations in Beijing		
Beijing Stock Exchange listed companies	Newly increased	Total market value
262	23 ↑	538.6 billion yuan
Total stock trading volume	YoY	
2973.58 billion yuan	3.1 times ↑	

In 2025, Beijing will implement with high standards the policy measures and incremental policies under the "Five Major Priorities," enhancing quality financial support for key strategies, critical sectors, and weaker areas, while improving the enterprise listing service mechanism. Advance the development of the "Two Zones" in the financial sector and continue optimizing the financial business environment. Host high-level events, including the Financial Street Forum and financial services sessions at CIFTIS, to further elevate Beijing's global financial influence.

## » Advanced industries gain momentum

Beijing's high-end, precision, and advanced industries rank among China's top tier, having cultivated three trillion-level industrial clusters of new-generation information technology, medical health, and scientific and technological services, and seven hundred-billion-level industrial clusters such as artificial intelligence and intelligent equipment. Among them, the healthcare industry surpassed one trillion yuan in scale last year, making Beijing the nation's first city to achieve this milestone and accelerating the formation of a capital-characteristic advanced industrial ecosystem.

- 2024: Launched an AI data operations platform with **22,000P** computing capacity (**220 exaflops**).
- Completed smart infrastructure across **600 km<sup>2</sup>** of high-level autonomous vehicle testing zones, logging **10mn km** annual mileage (**1,290 km/h**, equivalent to 13 Fifth Ring loops).
- Software/IT services revenue exceeded **3T yuan**; healthcare topped **1T yuan**.
- 2025: Release the “Beijing Embodied Intelligent Technology Innovation and Industry Cultivation Action Plan (2025-2027),” outlining a roadmap to establish global embodied AI leadership by 2027.

## » Headquarters economy as key pillar

The headquarters economy constitutes a defining feature of Beijing's economic landscape, playing a pivotal role in developing advanced industrial structures and driving high-quality socioeconomic development in the capital.

## » Premier hub for top talents and innovation

- Enhance international talent development, supporting cross-border innovation exchanges and sci-tech collaboration to broaden global perspectives and capabilities.
- Expand the Beijing Catalogue of Recognized International Professional Qualifications and the Beijing Catalogue of New Quality Productive Forces Talent Development, improving international talent recognition and service systems.
- Implement "single-window acceptance with parallel processing" for foreign work permits and work-type residence permits citywide, advance digital identity authentication for foreigners, and progressively optimize foreign-related government service scenarios to further facilitate the entry of senior executives from foreign enterprises and their family members.
- Develop international talent entrepreneurship platforms and high-end residential communities.

# DEVELOPMENT STRENGTH

Since the 18th National Congress of the CPC, Beijing has entered a new era of milestone significance in its development history. Confronting the “triple pressures” of domestic economic development under complex external conditions, Beijing has implemented the “Five Initiatives,” achieving aggregate growth, emerging sector expansion, structural optimization, and qualitative progress.

» **New milestone in building a global digital economy benchmark city**

As the national capital and an international center for scientific and technological innovation, Beijing is the source of innovation and openness for China's digital economy, and is also a leading city in the development of the digital economy. Emerging technologies like AI, advanced communication networks, ultra-HD video, industrial internet, cybersecurity, BeiDou, and VR have become key drivers of Beijing's high-quality development.

In 2024, Beijing accelerated its global digital economy benchmark city initiative, with core sectors maintaining fast-track growth and all districts showing robust momentum, significantly boosting industrial transformation and high-quality economic development.

## Digital industrialization unleashes new momentum

- Prioritizing AI as the core driver, **building internationally competitive digital industrial clusters**.
- **105** AI models approved by the Office of the Central Cyberspace Affairs Commission, **nearly 40% of China's total**.
- **China's first** metaverse complex launched in Shougang Park; Beijing Digital Human Base now hosts **2,805** digital human firms.
- Haidian AI cluster recognized as China's **only national-level advanced manufacturing cluster in AI**.

Existing AI enterprises

**2400+**

Core industry scale

**300+** billion yuan

## Industrial digitization expands new scenarios

- Accelerating digital transformation across manufacturing, finance, trade, agriculture, etc.
- **581** scaled manufacturers achieved digital standards; GE HealthCare Beijing named China's **first medical "Lighthouse Factory"**; added **9** national smart manufacturing demo plants.
- **1,785** fintech firms; digital RMB transactions exceeds **19 billion yuan**; digital ad industry scale **exceeds 150 billion yuan**.
- Cross-border e-contract platform serves **14,000+** certified firms.

## Digital technology innovation achieves new breakthroughs

- Focused on foundational software, brain science, AI and other key fields to accelerate breakthroughs in core technologies.
- UnionTech Software released a domestic OS with native large model capabilities.
- The ministry-municipality jointly built the Beijing Innovation Center of Humanoid Robots; its self-developed "Tiangong" next-gen universal robot platform achieves all-terrain adaptive mobility.
- AI large models keep pace globally: Doubao matches GPT-4.0 in multiple benchmark evaluations; Kimi leads with **2m-word** context; ShengShu Technology launches Vidu, China's first text-to-video model; Kuaishou enables **2-minute** long video generation.

## New infrastructure delivers results

- Issued the Implementation Plan of Beijing on Computing Infrastructure Construction, adding **8,620P** intelligent compute (total **22,000+ P**).
- Building a "City of Optical Networks and 10Gbps Connectivity" with **26,000** new 5G base stations; 5G base stations per 10,000 people: **No.1 nationally**.
- Piloted 5G-A/F5G-A with **12,000** 5G-A stations deployed.
- Industrial internet: **129** secondary nodes (**top nationally**), **8.8 billion** new ID resolutions, **1,000+** new firms.
- Commercial constellation development progresses steadily, with **100** satellites now in orbit.

## Data factor market creates new model

- Formulated top-level plan for data factors, approved to establish "One Zone and Three Centers": National Comprehensive Reform Pilot Zone for Market-based Allocation of Data Factors (Beijing), National Data Management Center, National Data Resource Center, National Data Circulation and Trading Center.
- Beijing Data Basic System Pilot Zone demonstrated positive effects, gathering **over 100** enterprises and building **China's first** AI data training base.
- Beijing International Big Data Exchange cumulative transaction volume reached **5.9 billion yuan**.
- **28** enterprises completed data asset accounting, totaling over **770 million yuan**.

## Benchmark projects show new highlights

- Focusing on leveraging benchmark breakthroughs, Beijing enacted the local regulation Beijing Autonomous Vehicles Regulations, established a high-level autonomous driving demonstration zone with smart infrastructure across **600 km<sup>2</sup>**, and achieved cumulative test mileage of **over 32 million km**.
- "Jingtong" mobile platform launched **233** services, integrated **1,000+** services in total, and provided **226** types of personal/corporate e-certificates.
- The citywide medical appointment system covered **300** secondary-tier and above hospitals, serving **250 million visits** annually.
- The "Digital Central Axis" project assisted Beijing's Central Axis in its successful bid for inclusion in the UNESCO World Heritage List.

### Digital economy takes new steps in opening-up

- Hosted the Global Digital Economy Conference 2024, producing nearly **200** deliverables (agreements/action plans/standards) and facilitating **10** digital economy projects in Beijing; added **9** new digital economy partner cities (**30** in total).
- Established **China's first** digital economy export innovation service base, attracting **70 plus** professional teams to its operation system and facilitating the first export order to Africa for base enterprises.
- Beijing named among **China's first** pilot cities for expanded opening-up of value-added telecom services.

### » *International Center for Science & Technology Innovation achieves positive progress*

Innovation efficiency continues to surge, with Beijing leading in new quality productive forces and maintaining its top position in China's sci-tech development rankings. The number of national high-tech enterprises, national "specialized, refined, characteristic, and new" small and medium-sized enterprise ("little giant" enterprises), and unicorn companies all rank first among cities in China. Newly established government investment funds have expanded to cover **8** investment sectors, with a total scale of **hundreds of billions of yuan**, supporting strategic, cutting-edge, and key equity financing projects.

National key laboratories in Beijing

**145**

Proportion of China's total

**28.2%**

National specialized, refined, characteristic, and new "little giant" enterprises

**1035**

Municipal "specialized, refined, characteristic, and new" enterprises

**10,199**

Unicorn enterprises

**115**

Total market valuation

**\$ 594.9** billion

## A more vibrant open innovation ecosystem

- The Regulations on the Construction of Beijing International Center for Science & Technology Innovation have been officially implemented. Zhongguancun has rolled out **24** pioneering reform measures, with **19** universities and research institutions having licensed **over 500** patents to small and medium-sized enterprises.
- **10** centrally-affiliated units and **11** municipal units have carried out pilot projects for job-related scientific achievement management, with a cumulative layout supporting **25** benchmark incubators and **26** concept validation platforms.
- Approved as a pilot for equity investment by financial asset investment companies, and the establishment of private equity funds can now be processed online; **Beijing's first** national intellectual property protection demonstration zone has been approved, with **11** new intellectual property public service workstations established.

## Enhanced innovation vitality in enterprises

Annual R&D spending of key large and medium-sized enterprises above designated size  
**395.8** billion yuan

YoY ▲  
**5.1%** ↑

R&D spending of industrial enterprises  
**62.18** billion yuan

Growth  
**17.6%** ↑

R&D spending of information transmission, software, and IT service enterprises  
**297.52** billion yuan

Growth  
**3.3%** ↑

R&D spending of scientific research and technology service enterprises  
**36.1** billion yuan

Growth  
**0.5%** ↑

Total R&D spending of key large and medium-sized enterprises in the "Three Cities One Area"<sup>[1]</sup>  
**271.89** billion yuan

Growth  
**4.3%** ↑

Proportion of R&D spending by key enterprises citywide  
**68.7%**

[1] : The main platform of "Three Cities One Area" refers to Zhongguancun Science City, Huairou Science City, Future Science City and the Demonstration Zone of Innovative Industrial Clusters, which is the main platform for Beijing to build an international science and technology innovation center.

## Prominent role of sci-tech innovation as the main platform

- The Ministry of Industry and Information Technology, Ministry of Science and Technology, and municipal government jointly issued the construction plan for Zhongguancun Science Park to become a world-leading science and technology park. The technology income of key enterprises above designated size in Zhongguancun increased by **over 10%** year-on-year. The "one park, one plan" approach promotes the reform and upgrade of sub-parks, exploring the establishment of a new "government + market" operation and management model.
- Coordinated linkage and integrated development of the "Three Cities One Area:" Zhongguancun Science City has put the General AI Innovation Park into use, the Life Science Industry Innovation Institute of Huairou Science City has been unveiled, the main construction of the first phase of the International Bioengineering Center in Future Science City has been completed, and the Demonstration Area for Innovation-based Industrial Clusters has absorbed over **280** achievements from the three science cities.

## Continuously optimized innovation environment

### Initial results from sci-tech finance support

---

- A total of **8** government-guided industrial funds have been established, focusing on high-end and cutting-edge industry segments such as AI and IT.
- In November 2024, the Beijing-Tianjin-Hebei investment and financing service mechanism was launched, with **17** funds from the three regions signing contracts with **35** enterprises, realizing an investment amount of **3 billion yuan**, and promoting the deep integration of cross-regional capital chains, innovation chains, and industry chains.

### Comprehensive implementation of pilot policies in the Zhongguancun National Demonstration Zone

---

- **Over 50** supporting measures for pilot reforms have established a relatively complete institutional guarantee in terms of achievement rights and interests, income distribution, etc., encouraging enterprises to increase R&D investment and achieve a virtuous cycle.

Improved quality and efficiency of R&D results

Steady improvement in innovation output capacity

Annual invention patent grants	YoY ▲
120,000 units	10.9% ↑
Valid invention patents held at the end of the year	Growth
663,000 units	15.5% ↑
PCT international patent applications	Growth
12,000 units	5.7% ↑
High-value invention patents per 10,000 people	▲
159.81 units	22.86 units

Steady growth in the technology market

Total recognized and registered technology contracts	Transaction value of technology contracts	Growth
102,910	915.33 billion yuan	7.2% ↑

Significant breakthroughs in R&D achievements

- In 2024, future industry layouts and new quality productive forces cultivation results, such as hydrogen internal combustion engines, Zhuque-3, Tiangang 1.2MAX, and brain-computer interfaces, were implemented in Beijing, achieving breakthroughs in core technologies and demonstrating green, high-end, and intelligent development trends.
- During the year, **China's first** AI data training base was completed, **the world's first** general AI entity "Tong Tong" was officially released, **105** large models were registered and launched, **the world's first** full-size humanoid robot achieved simulated running on pure electric drive, the High-Level Autonomous Driving Demonstration Zone completed intelligent infrastructure deployment across 600 square kilometers, **29** scientific facilities at Huairou Comprehensive National Science Center entered research operations, and Brain-Computer Interface No. 2 filled the domestic gap in brain-computer interface technology.

## Continuously enhanced international influence

- According to the *International Center for Science & Technology Innovation Index Report 2024*, Beijing ranked **3rd** globally in 2024, maintaining its third position for three consecutive years, and ranking second in both dimensions of science centers and innovation hubs.
- The *Global Innovation Index 2024* released by the World Intellectual Property Organization shows that Beijing ranked **3rd** in 2024, up one spot from the previous year.

» **Steady progress in cultivating an international consumption center city**

In 2024, Beijing continued to accelerate the cultivation and construction of an international consumer center city, with expanded and upgraded consumption scenarios, continued growth in consumption scale, and active new consumption models.

**Continuously expanding and upgrading consumption scenarios**

**Further enhanced commercial supply capacity**

Annual new large commercial facilities

- Released 93 "Walking in Beijing" premium tourism routes throughout the year, enriching cultural and tourism consumption scenarios.
- Hosted 43 international sports events, an increase of 21 compared to the previous year.

**Increasingly active new consumption models**

**Rising online engagement of commercial entities**

- In 2024, the online engagement rate of wholesale, retail, accommodation, and catering enterprises above designated size reached 49.5%, an increase of 1.5 percentage points from the previous year. Among these, the catering industry reached 61.8%, an increase of 1.3 percentage points from the previous year.

**Expanding scale of online retail**

- In 2024, online retail sales of wholesale, retail, accommodation, and catering above designated size in Beijing reached 578.66 billion yuan, a year-on-year increase of 1.7%, accounting for over 40% of the total retail sales of consumer goods in the city, the highest level of the year.
- The instant retail model has become increasingly popular, with convenience stores, supermarkets, warehouse clubs, and other formats above designated size achieving a total retail sales growth of 9.4% through public networks, an increase of 4.9 percentage points from the previous year.

## » Steady progress in the "Two Zones" construction

In 2024, Beijing advanced its "Two Zones" development by implementing Demonstration Zone 2.0, upgrading its free trade pilot zone strategy, and launching institutional opening pilot programs aligned with international standards, thereby consolidating its leadership in institutional openness, achieving new milestones in open economy development, energizing open platforms, and making solid progress in high-quality development through higher-level openness. In 2024, the number of newly established foreign-invested enterprises in the city increased by 16.4% year-on-year, 6.5 percentage points higher than the national average, with 7,187 new projects landed under the "Two Zones" initiative.

### Since the "Two Zones" initiative

**34.1%**

### New progress in institutional opening aligned with international standards:

- Beijing accelerated implementation of the State Council-approved Service Sector Opening-up 2.0 plan, completing **over 80%** of tasks within one year.
- Fully implemented institutional opening measures in the Free Trade Zone pilot aligned with international standards, introducing a series of **groundbreaking pilot policies**.
- **China's first** foreign-invested enterprise in "human stem cells, gene diagnosis and treatment technology" was established in Beijing, while releasing **China's first** scenario-based, field-level negative list for cross-border data flow in the Free Trade Zone and the first catalogue of recognized international professional qualifications, and launching **China's first** pilot zone for rare disease drug supply, while establishing a Beijing-characteristic fast review and approval mechanism for clinically needed imported drugs and devices.

### New achievements in systemic reforms serving the "Four Centers" construction:

- Beijing Zhongguancun Comprehensive Bonded Zone became operational, pioneering smart supervision models.
- Expanded policy coverage and effectiveness, including cross-border financing facilitation pilots for high-tech, specialized/sophisticated, and tech-based SMEs.
- Implemented measures to build an international artwork trading and exhibition center.

### New steps in open economic development focusing on new quality productive forces:

- Beijing launched the "Beijing Global Service Partners" program, certifying the first batch of **13** partner enterprises.
- Annual actual utilized foreign direct investment: Scientific research and technical services: **\$3.74 billion**, accounting for **51.7%**; Leasing and business services: **\$1.85 billion**, accounting for **25.6%**; Information transmission, software, and IT services: **\$380 million**, accounting for **5.3%**.
- Beijing Yizhuang Comprehensive Bonded Zone was approved, set to become **China's first** comprehensive bonded zone focused on cultivating new quality productive forces.
- Beijing Tianzhu Comprehensive Bonded Zone ranked 2nd nationwide in the 2023 Comprehensive Bonded Zone Development Performance Evaluation results, achieving its best historical performance.
- Beijing Daxing International Airport Comprehensive Bonded Zone saw its import/export value ranking rise by **55 places**, the **largest increase nationwide**.

# DEVELOPMENT STRATEGY

## » Deepen the Comprehensive Reform of the "Two Zones"

Since the construction of the "Two Zones", Beijing has implemented more than **140** breakthrough policies, including more than **70** national breakthrough policies, **ranking first** in the national comprehensive pilot demonstration assessment of expanding the opening-up of the service sector for three consecutive years.

### Promote High-level Institutional Opening with Greater Efforts

- **Create a transparent, stable and predictable institutional environment:** Prepare the 3.0 plan for the comprehensive demonstration zone for expanding the opening of the service industry; implement the promotion strategy for the national free trade pilot zone; focus on key areas to formulate plans to support the integrated innovation of the industrial chain.
- **Enhance facilitation of services in key open areas:** Release the "Guidelines for Overseas Patients to Seek Medical Treatment in Beijing in 2025"; deepen the pilot program for streamlined review and approval of supplementary drug applications; implement the pilot approval of clinical trials of innovative drugs; and issue the regulations on the establishment of the Beijing International Commercial Arbitration Center.
- **Promote high-quality development of foreign trade:** Further promote the quality and upgrade of the China International Fair for Trade in Services (CIFTIS); expand the global layout of competitive products, expand the growth opportunities of intermediate product trade; and deepen the construction of Beijing AEO cultivation demonstration base.
- **Deepen the opening and innovation in the financial sector:** Promote the full launch of the CCER (China Certified Emission Reduction) trading market; promote the implementation of the National Green Technology Trading Center; support the Beijing Stock Exchange to optimize the issuance and listing system arrangements, and accelerate the launch of ETF (Exchange-Traded Fund) products.
- **Strengthen the guarantee of high-quality resource factors:** Accelerate the construction of the data

basic system pilot zone; Continue to implement the nationwide pilot program for end-to-end optimization and the upgrading of the ultra-high-definition audio-visual industry chain; iteratively release the negative list of data outbound from the free trade pilot zone; and continue to upgrade the "Beijing International Professional Qualifications Recognition Catalog".

## Greater Efforts are Made to Carry out Distinctive and Differentiated Explorations

### Support pilot free trade zones in pioneering bold reforms

---

#### *Science and Technology Innovation Area:*

- **Haidian Cluster:** Form a list of application scenarios around artificial intelligence and related fields, and deliver more first orders and first innovative achievements.
- **Changping Cluster:** Promote open innovation in the entire pharmaceutical and health industry chain, and build a public service and resource sharing platform for beauty and health.

#### *International Business Service Area:*

- **Chaoyang Cluster:** Create an international commercial arbitration center with concentrated arbitration resources.
- **Shunyi Cluster:** Continue to promote the construction of the National Import Trade Promotion Innovation Demonstration Zone.
- **Tongzhou Cluster:** Formulate an ESG (Environmental, Social, and Governance) innovation pilot program to support high-standard development of the National Green Development Demonstration Zone.

#### *High-end Industrial Area:*

- **Daxing Cluster:** Strengthen the construction of data outbound policy consulting service centers and international data ports, and create dedicated cross-border data infrastructure.
- **Yizhuang Cluster:** Accelerate the construction of national strategic industry platforms for integrated circuits and IT innovation, and promote the implementation of innovative scenarios such as the autonomous driving demonstration zone 4.0.

### Actively promote regional coordinated development of opening-up

---

- **Implement** the "Beijing-Tianjin-Hebei Free Trade Pilot Zone Coordinated Development Action Plan (2025)", and make good use of the "one place innovates, three places share mutual recognition" policy sharing mechanism.
- **Conduct** joint investment promotion with Tianjin and Hebei to guide high-quality resources allocation

across the region.

- **Implement** the cooperation agreement in the fields of free trade and business between Beijing and Hainan, and promote the "Beijing-Hainan integration" of institutional integrated innovation.
- **Strengthen** the coordinated cooperation among the provinces and cities in the national comprehensive pilot demonstration of expanding the opening-up of the service sector.

### Promote the characteristic innovation and development of major parks

---

- **Promote** the optimization of the Financial Street to form an international development environment; Build Longfusi into a high-quality cultural consumption park.
- **Establish** Shougang Park as the permanent venue for CIFTIS to achieve the dual promotion of exhibition and conference and regional economic and social development.
- **Strengthen** the bilateral cooperation between Sino-German and Sino-Japanese industrial parks, expand the scale and influence of the Sino-German (European) Hidden Champion Forum, and promote the Sino-Japanese Demonstration Zone into an innovation service base for Beijing digital economy enterprises going global.
- **Support** the optimization of the layout of national-level fintech demonstration zones and Lize Digital Fintech Demonstration Park to enhance the carrying capacity of digital financial development.
- **Expand** the industrial scale of Zhongguancun (Chaoyang) Internet 3.0 Industrial Park and Beijing Digital Human Base, establishing an Internet 3.0 industrial highland.
- **Carry out** the construction of Beijing Unmanned Aviation Demonstration Zone.
- **Create** Beijing's low-altitude safety and emergency industrial park to attract and cultivate low-altitude enterprises.
- **Take the lead** in exploring the construction of the Digital Silk Road Economic Cooperation Pilot Zone.
- **Build** a commercial closed-loop "Beijing West Intelligence Valley" with a complete industrial ecosystem, and accelerate the construction of the ultra-high-definition audio-visual (computational audio-visual) innovation application demonstration zone.
- **Enhance** the core competitiveness of the Beijing-Pingyuan comprehensive logistics hub.
- **Continue** to promote the climate investment and financing pilots.
- **Promote** the open sharing of large scientific facilities in Huairou Science City.
- **Promote** the participation of the "Energy Valley" of the Future Science City in the formulation of international standards and create an innovation highland for advanced energy industries.

### Promote the improvement of the opening function in comprehensive bonded zones

- **Beijing Tianzhu Comprehensive Bonded Zone:** Accelerate the construction of a pilot zone for rare disease drug security, and facilitate the temporary import of clinically urgently needed varieties.
- **Beijing Daxing Airport Comprehensive Bonded Zone:** Accelerate the creation of an integrated zone-port supervision model, and explore the establishment of a rapid response mechanism for customs clearance sampling of imported drugs.
- **Beijing Zhongguancun Comprehensive Bonded Zone:** Improve the intelligent supervision model, and conduct investment promotion based on the "2+2+N" industry positioning.
- **Beijing Yizhuang Comprehensive Bonded Zone:** Ensure that the acceptance inspection is passed on schedule.

### Greater Efforts to Stabilize the Expectations and Confidence of Foreign Companies and Investment

- **Strive to implement two-way investment:** Focus on Fortune 500 companies, as well as specialized, sophisticated, unique, and innovative enterprises, etc., and ensure effective project matching and attraction; promote the orderly opening of service industries such as telecommunications and medical care, and strive to attract more landmark foreign investment projects; support foreign companies in Beijing in expanding their reinvestment efforts; establish Beijing's "Belt and Road" Express Integrated Service Platform to facilitate high-quality "going global" opportunities for enterprises.
- **Improve the investment promotion mechanism:** Enhance the coordinated linkage investment promotion mechanism comprising the "Municipal Investment Promotion Center + Industry Regulatory Department + Investment Promotion Main Area + Functional Area (Park Platform)", and carry out precise investment promotion; strengthen the responsibility of industry regulatory departments to stabilize and attract foreign investment, and jointly promote the establishment of several landmark projects; utilize the multilateral foreign affairs platform, leverage the international sister city cooperation mechanism, and promote more investment cooperation projects.
- **Expand the investment promotion network:** Utilize Beijing's overseas investment promotion service stations and overseas liaison stations to strengthen joint investment promotion for "going global"; make effective use of the resources of the World Association of Investment Promotion Agencies (WAIPA) and domestic and foreign friendly business associations, and deepen cooperation with investment promotion agencies and business associations in major cities in the world.
- **Improve the quality of "Beijing Services":** Fully implement the "Beijing Foreign Investment Regulations" and protect the rights and interests of foreign investment in accordance with the law; cultivate "Beijing Global Service Partners", improve the roundtable meeting mechanism of foreign-funded

enterprises and the "closed-loop" demand response mechanism, and facilitate regular communication channels between the government and enterprises; make effective use of the 240-hour transit visa-free policy to optimize and enhance the full-chain service system, including entry, travel, accommodation, sightseeing, shopping, and payment.

## » **Precisely Strengthen the Development of High-grade, Precision and Advanced Industries**

Beijing will closely monitor the trends in the scientific and technological revolution and industrial transformation, make every effort to implement industrial chain projects, and foster a superior industrial ecosystem. We strive to achieve 30% of the added value of high-tech industries in the regional GDP by 2025.

- Advance the construction of major projects in the integrated circuit sector.
- Support new energy vehicle enterprises in scaling up and strengthening their operations.
- Promote the establishment of CDMO (Contract Development and Manufacturing Organization) platforms for nucleic acid drugs, antibody-drug conjugates, and other products. Build an International Biopharmaceutical Innovation Park (Bio-Park), actively advance major projects such as those with Sanofi and AstraZeneca, and implement initiatives to enhance and upgrade the medical device industry.
- Develop the low-altitude technology and industry, and create a pilot zone for technology innovation and industrial development in this field.
- Strive to establish a national-level future industry pilot zone in Beijing. Promote the industrialization project for humanoid robots, establish the World Humanoid Robot Games, implement the action plan for quantum technology innovation and the cultivation of an industrial ecosystem, and strengthen the construction of the supply chain for the commercial aerospace industry.
- Improve the quality and efficiency of financial services for the real economy, enhance the multi-level financial market system, and support the Beijing Stock Exchange in becoming larger and stronger. Explore innovative products such as "R&D Loans" and "Innovation Credit Score Loans" to guide credit funds toward small and micro enterprises. Enrich financial products for the third-pillar pensions. Promote the digital and intelligent transformation of financial services, and actively broaden the application scenarios for e-CNY. Establish and improve the fault tolerance mechanisms for government investment funds, promote equity investment and the development of patient capital, and cultivate more listed companies.
- Build a distinctive cluster of science and technology service industries. Encourage advertising companies to enhance their digitization and quality, and increase efforts to develop professional services such as

human resources, accounting, and law.

- Explore the "Beijing Model" for the integrated development of modern service industries and advanced manufacturing industries.

## » **Accelerate the Construction of an International Science and Technology Innovation Center**

By 2027, Beijing's International Science and Technology Innovation Center will reach world-class levels of internationalization, with continuously improved open innovation ecosystems that are globally competitive. The flow of talent, technology, and capital will lead the world in activity. The international science and technology cooperation mechanism among governments and parks will be continuously enriched, and the vitality of private international science and technology exchanges and cooperation will continue to increase. **15** laboratories will participate in the construction of the "Belt and Road" joint laboratories, promote **100** international joint R&D projects, and establish **300** foreign-funded R&D centers in Beijing. The number of patent applications through the Patent Cooperation Treaty will reach **12,000**, and **120** scientific and technological journals will enter the Q1 category of Clarivate Analytics. The international influence and attraction of the Zhongguancun Forum will be significantly enhanced, and the global influence of the science and technology activity matrix will continue to improve, injecting new vitality into global science and technology cooperation.

## **Actions to Expand the International Scientific and Technological Cooperation Network**

- **First, continue to enrich and improve the system for international science and technology exchange and cooperation.** Actively integrate into national science and technology diplomacy efforts, build bilateral and multilateral intergovernmental cooperation frameworks, and broaden channels for non-governmental science and technology exchanges.
- **Second, establish an important hub for the "Belt and Road" innovation cooperation network.** Implement the Beijing Action Plan for Science and Technology Innovation in the New Era of the "Belt and Road" Initiative, deploy innovation platform carriers in the regions along the Belt and Road, and participate in the joint construction of "Belt and Road" joint laboratories and new infrastructure.
- **Third, accelerate the development of international science and technology organizations and institutions.** Support the establishment of international science and technology and standard organizations in Beijing, encourage science and technology talents to work part-time and hold positions in international organizations, and support foreign universities and institutes in setting up research institutions in Beijing.

## Actions to Improve the Quality of International Scientific and Technological Cooperation Carriers

- **First, strengthen and enhance the international capabilities of the "Three Cities and One District".** Support the "Three Cities and One District" in improving their international development capabilities in basic research, high-tech R&D, and future industrial development, leveraging their respective innovation and resource advantages.
- **Second, tap into the development potential of international scientific and technological cooperation within sub-parks.** Promote the enhancement of innovation governance capabilities in each sub-park of Zhongguancun, create an international industrial innovation map, establish an international industrial cooperation database, and effectively implement international scientific and technological cooperation.
- **Third, deepen and expand the construction of international innovation clusters.** Strengthen the development of the Sino-Japanese and Sino-German international innovation clusters, support bonded R&D and offshore innovation within the comprehensive bonded zones, and expedite the development of the Chaoyang International Venture Capital Cluster.

## Implementation of Actions for Establishing an International Scientific and Technological Cooperation Platform

- **First, strengthen the development of international science and technology cooperation bases.** Optimize the recognition mechanism for these bases, cultivate functional units for international science and technology cooperation in a classified manner, and deepen international exchange and cooperation relationships.
- **Second, continue to foster cross-border technology transfer institutions.** Encourage these institutions to accelerate their overseas presence, support cross-border technology transfer organizations in improving their international networks, and guide science and technology incubators in establishing a "fast-track" mechanism for international science and technology projects.
- **Third, promote the open sharing of large scientific facilities with the world.** Fully utilize the role of the Huairou Comprehensive National Science Center, plan to initiate or participate in international large-scale scientific programs and projects, and gradually build an open and shared innovation ecosystem based on large scientific facilities.
- **Fourth, support science and technology parks in strengthening international cooperation.** Focus on the development and establishment of overseas science and technology parks along the "Belt and Road." Guide various sub-parks, specialized industrial parks, university science and technology parks, and other park carriers in enhancing collaboration with international science and technology parks and

innovation hubs, strengthen innovation cooperation and industrial integration, and improve the efficiency of international innovation services.

## Implementation of Actions to Enhance International Cooperation Among Innovation Entities

- **First, deepen international collaborative innovation throughout the entire innovation chain.** Promote international exchanges and cooperation in basic science, focusing on fields such as next-generation information technology and applied technology. Conduct international joint research in cutting-edge areas like quantum technology to cultivate future industries.
- **Second, promote the agglomeration and development of foreign-funded innovation entities.** Deepen the implementation of policies supporting foreign-funded R&D centers and encourage the growth of both the number and quality of these centers. Target globally renowned technology companies for potential "listings" to foster development in Beijing.
- **Third, facilitate the integration of scientific and technological innovation with industrial innovation.** Encourage leading technology companies to optimize their international innovation strategies and strengthen collaboration within international industries. Support innovation entities in applying for foreign patents and participating in international standardization activities. Additionally, assist enterprises in engaging with globally recognized industry-specific exhibitions to gradually enhance the effectiveness of "business-through-conferences".

## Implementation of Actions for Enhancing the Open Innovation Ecosystem Excellence

- **First, optimize and improve the intellectual property environment.** Support overseas intellectual property service agencies and other organizations to operate in Beijing, foster connections with international intellectual property agencies, create a conducive international intellectual property environment, enhance the intellectual property financing and insurance service system, and assist enterprises in "going global".
- **Second, elevate the service level for the international development of talent.** Support Beijing's scientific and technological talents in expanding their international perspectives, improve the identification processes and service guarantees for international talents, enhance the convenience of relocating to Beijing and the starting of businesses, and increase the attractiveness of the city for international talents.

- **Third, improve the international science and technology financial service mechanism.** Accelerate the development of the Zhongguancun Science and Technology Innovation Financial Reform Pilot Zone, engage with large foreign financial institutions, support science and technology companies in going public overseas, and offer specialized international financial services for small and medium-sized science and technology firms.
- **Fourth, actively promote policy and institutional innovation and reform.** Engage with reform initiatives to facilitate the free flow and efficient allocation of international innovation factors and resources, and implement more comprehensive reform measures across the entire demonstration zone.

### Implementation of Actions to Promote International Scientific and Technological Exchanges and Cooperation

- **First, continue to hold the Zhongguancun Forum at a high level.** Emphasize both the national and international development of the Forum, creating a high-level open platform for global hosting, participation, and dissemination.
- **Second, build a high-level international scientific and technological activity matrix.** Organize the IASP 2025 World Conference with "best standards," cultivate high-end, branded, and internationalized scientific and technological exchange activities, and establish a cutting-edge academic exchange platform during the Beijing International Academic Exchange Season.
- **Third, create academic journals with international influence.** Support the establishment of world-class academic journals, deepen the practice of open science in Beijing, and continuously enhance the international influence and appeal of Beijing's innovation.

## » **Strengthening the Construction of a Global Digital Economy Benchmark City**

In 2025, Beijing shall strengthen its position as a global digital economy benchmark city, targeting an **8%** growth rate in the added value of the digital economy, which is expected to account for more than **45%** of GDP. To achieve this goal, the following "five actions" will be implemented.

### **Implement the "Artificial Intelligence +" Action**

- Support the iterative upgrade of artificial intelligence big models, and promote the establishment of an autonomous and controllable AI technology innovation system.
- Formulate relevant policies and measures for artificial intelligence for new industrialization, actively promote the application of big models in **10** key areas such as medicine, automobiles, materials, software, and electronics, and develop a set of high-quality industry data sets.

### **Implement the Demonstration Benchmark Leading Action**

- Plan influential benchmark projects that drive super-large city governance and high-quality development scenarios.
- Extend the 4.0 stage construction of high-level autonomous driving demonstration zones to central urban areas and newly developed cities. Organize a "one conference and one competition" for robots, namely the World Humanoid Robot Games and the Robot Half Marathon, to create a comprehensive demonstration project for the "Robot Application Capital".
- Accelerate the construction of 6G laboratories.
- Implement the ultra-high-definition video "super-site" demonstration project.

### **Implement the Infrastructure Improvement Action**

- Achieve continuous coverage with lightweight 5G/5G-A base stations.
- Coordinate the supply of domestic computing chips, aiming for a total supply scale of smart computing in the city to reach **45,000 P**.
- Promote the completion of IPv6 transformation for government external network management departments in each district.

### **Implement the Data Element Value Release Action**

---

- Build a national comprehensive pilot zone for market-oriented allocation reform of data elements with high standards, and accelerate the innovation and optimization of the data basic system.
- Improve the market-oriented operation and management level of Beijing International Big Data Exchange, and continue to promote data assetization.
- Promote the sharing, opening and authorized operation of public data, and cultivate and expand the data element industry

### **Implement the "Going Out" Action for the Digital Economy**

---

- Host the Global Digital Economy Conference at a high level, accelerate the creation of an innovation service base for Beijing's digital economy enterprises to expand overseas, continue to focus on cross-border data transactions and the internationalization of digital solutions, and promote development through opening up.

## **» Solidly Promote the Construction of a National Cultural Center**

---

Beijing is committed to enhancing its cultural landscape by refining the cultural system and mechanisms, thereby promoting the construction of the national cultural center. The city will vigorously uphold core socialist values, support the prosperity and development of cultural undertakings and industries, and continuously strengthen its cultural soft power and influence.

### **Meticulously Inheriting the City's Historical and Cultural Heritage**

---

Strengthen the systematic protection of historical and cultural heritage, deeply explore the rich connotations of ancient capital culture, red culture, Beijing-style culture, and innovative culture, and increase efforts in value interpretation and dissemination.

- Formulate a three-year action plan for the protection and inheritance of Beijing's Central Axis. Create a national cultural relics protection and utilization demonstration zone for the Central Axis, and improve cultural interpretation and international communication of the Central Axis. Organize the Beijing International Intangible Cultural Heritage Week and enhance the operational capacity of the Beijing Intangible Cultural Heritage Experience Center.
- Promote the development of the Beijing Great Wall Protection Regulations, utilize the construction of national cultural parks to drive the development of three cultural belts, carry out restoration of cultural

relics and historical sites along the Grand Canal, initiate no fewer than 10 emergency conservation projects for the Beijing Great Wall, and commence preliminary work on the Liulihe site for its World Heritage application.

- Foster the development of a "City of Museums" by strengthening inter-museum collaboration and integrating museums with the city. Successfully host the 2025 International Museum Day China Main Venue event.
- Enhance the inheritance and protection of rural culture and traditional village heritage, and successfully organize a series of events, such as the Beijing Farmers' Art Festival. Promote "Internet innovation" in cultural and museum collections.

### Stimulating the Vitality of Cultural Development

---

Strengthen the empowerment of science and technology, promote cultural digitization, develop new cultural formats, and create more innovative cultural content for the new era.

- Promote the construction of a "Performance Capital" with "Grand Shows in Beijing" as the focal point. Accelerate the construction of the Beijing Opera and Dance Theater as well as the Beijing South Art Center. Foster the creation of performing arts clusters and distinctive communities, such as those in Wangfujing and Tianqiao. Increase the number of singing and performance activities, vigorously develop the performing arts economy, premiere at least **100** plays, and aim for the permanent establishment of the China Radio and Television Masterpiece Creation Conference.
- Promote the development of a book-loving city and enhance the "I and the Temple of Earth" brand.
- Encourage the reform of separating ownership from use rights in public cultural facilities, while innovating the ways in which social capital can participate in museum operations. Improve catering and other supporting services at public cultural and tourism venues. Pilot the removal of the "skip-stop" access policy for subways serving large-scale events.
- Accelerate the transformation and industrialization of cultural and technological innovations, and guide the quality improvement and innovation in the ultra-high-definition audiovisual industry. Implement a creation plan for online micro-short dramas on themes such as "First Light of the Tiny Spark".
- Establish a high-quality event system called "Double Olympics 100", recruit professional venue management organizations, host **12** premier events, promote the development of original high-quality games in Beijing, and attract e-sports events to the city.

### Actively promote exchanges and mutual learning among civilizations

Utilize international languages and methods to present cultural achievements more effectively and better showcase the image of the country and its capital.

- Meticulously organize cultural promotion activities such as "Charming Beijing," continue to build international communication brands like "Silk Road Influencers' Beijing Tour," and successfully host "Colorful World"—a showcase of distinctive cultures from countries along the Belt and Road.
- Conduct city promotion activities for major international events, such as the Osaka World Expo and the APEC Summit.
- Strengthen resource integration and coordination efforts. Establish a communication matrix for overseas social platforms, expand new media channels, as well as radio, television, and audiovisual outlets for external publicity, and effectively share the China's stories and Beijing's stories.

### » Continue to Strengthen the Function of an International Exchange Center

Release the immense potential of the international exchange center. Improve the systems and mechanisms for its construction, create an all-encompassing international service environment, and build an open and inclusive city that is attractive to the international community.

- Promote the expansion and upgrading of the Yanqi Lake International Conference City and develop the construction of connecting routes in Huairou, Miyun, and other locations. Increase the inventory of venues suitable for high-level diplomatic and foreign affairs activities. Accelerate the multifunctional and diversified use of the second phase of the new China International Exhibition Center. Advance the preliminary work on projects, such as the exhibition consumption hub in the airport economic zone of Daxing International Airport. Enhance supporting facilities, including transportation and commercial services, around the venue.
- Issue the Beijing International Service Work Plan and facilitate the convenient application of the new version of the permanent residence permit in Beijing. Continuously update the English version of the Beijing map, improve foreign language signs and guidance facilities at scenic spots, airports, and other locations, innovate measures for transit visa exemptions, and position Beijing as the "preferred destination for inbound tourism."
- Improve the mechanism for "setting the stage" for exhibitions and "performing the show" for economic and trade activities. Promote the quality and upgrade of the China International Fair for Trade in Services

(CIFTIS), ensure the regular hosting of the Zhongguancun Forum, expand the communication and influence of the Beijing Cultural Forum, and enhance the international profile of the Financial Street Forum Annual Meeting.

- Carry out the revision of the master plan for the "dual hubs," collaborate on developing the implementation plan for the construction of the Beijing-Tianjin-Hebei world-class airport cluster, and concentrate scarce long-distance air rights resources in the "dual hubs".
- Guide the differentiated development of the dual airport economic zones and accelerate the implementation of industrial projects.

# 02

**Invest Beijing**  
**Beijing Foreign Investment Guide (2024-2025)**

## **Experience Beijing**

46 Key Areas

61 Investment Areas

68 Investment Projects

# KEY AREAS

The "14th Five-Year Plan" period is a critical period for Beijing to implement the strategic positioning plan of the capital city, to build it into an international science and technology innovation center, a cutting-edge economic structure, and promote the coordinated development of the Beijing-Tianjin-Hebei regions. The National Comprehensive Demonstration Zone for Expanding and Opening-up of the Service Sector and the China (Beijing) Pilot Free Trade Zone are the glorious missions entitled to Beijing by the central government. Beijing will promote the construction of the National Comprehensive Demonstration Zone for Expanding Open-up of the Service Sector and the China (Beijing) Pilot Free Trade Zone with high standards, which will highlight technological innovations, opening-up of service industry and digital economy, and inject strong impetus into Beijing's high level openness and high-quality development.

## » **National Comprehensive Demonstration Zone for Expanding and Opening-up of the Service Sector**

On November 23, 2023, the State Council approved the "Work Plan to Support Beijing in promoting the Construction of National Comprehensive Demonstration Zone for Expanding Open-up of the Service Sector"(referred to as the Demonstration Zone 2.0 Plan). The Demonstration Zone Plan 2.0 is the upgrading of the Demonstration Zone Plan 1.0 which was launched in 2020, pointing out the direction for Beijing to promote high-level opening up in the next stage.

### **Promote the deepening of reform and expansion of opening up in key areas of the service industry:**

Telecom services | Health and medical services | Financial services  
Cultural and educational services | Professional services.

### **The Demonstration Zone 2.0 Plan Launches more than 170 new pilot measures**

Deepening reform and opening up in key areas of the service industry | Exploring rules and regulations for emerging industries | Optimizing institutional arrangements for trade and investment | Improving the public service policy environment | Strengthening rights protection mechanisms | Improving risk prevention and control systems

### Actively align with international high-standard economic and trade rules

- Based on the classification and summary of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) and the Digital Economy Partnership Agreement (DEPA) and other international high-level free trade agreements, the Demonstration Zone 2.0 plan focuses on the rules and norms "at the border" and "behind the border," conducting more extensive pilot tests and pressure tests.

## » China (Beijing) Pilot Free Trade Zone

The China (Beijing) Pilot Free Trade Zone (hereinafter referred to as the Beijing Pilot Free Trade Zone) is a national-level pilot free trade zone approved by the State Council in 2020. The establishment of the China (Beijing) Pilot Free Trade Zone is a major decision made by the CPC Central Committee and the State Council, and an important strategic measure to promote reform and opening up in the new era.

Science and Technology Innovation Area

Planned area	Focusing on
31.85 square kilometers	A new generation of information technology   Biology and health   Scientific and technological services, etc.

Key layout
<p><b>Haidian Cluster</b></p> <ul style="list-style-type: none"><li>● Support the development of artificial intelligence industries, intelligent connected vehicle industries, gaming and esports industries, and financial sectors.</li><li>● The Cuihu area will focus on digital industries such as artificial intelligence, next-generation communication networks, and intelligent connected technologies.</li></ul> <p><b>Changping Cluster</b></p> <ul style="list-style-type: none"><li>● With Life Science Park as the core, focus on innovative pharmaceuticals, high-end medical devices, precision medical services and other advantageous fields.</li><li>● Actively deploy cutting-edge directions such as cell and gene therapy and "AI + medical".</li></ul>

## International Business Service Area

Planned area	Focusing on
<b>48.34</b> square kilometers	Digital trade   Cultural trade   Business conventions and exhibitions   Healthcare   International delivery and logistics   Cross-border finance, etc.

### Key layout

#### Shunyi Cluster

- Focus on digital trade, focusing on the development of cross-border e-commerce, cultural copyright, digital medical care, intelligent manufacturing, smart logistics, smart transportation, etc.
- Relying on Beijing Tianzhu Comprehensive Bonded Zone to promote the development of new formats of cultural and art works.

#### Chaoyang Cluster

- Give full play to the advantages of rich international resources and the concentration of foreign trade enterprises, focusing on cross-border e-commerce, digital medical care, cultural creativity, human resources services and other fields.

#### Tongzhou Cluster

- Focus on the development of cultural and creative trade, specializing in creative design, digital content, original animation, copyright operation and other fields.

High-end Industrial Area

Planned area	Focusing on
39.49 square kilometers	Business services   International finance   Cultural creativity   Biotechnology and big health, etc.

Key layout
<p><b>Daxing Cluster</b></p> <ul style="list-style-type: none"><li>● Focus on high-end manufacturing industries, prioritizing the R&amp;D and manufacturing of intelligent equipment related to hydrogen energy, robotics, and aerospace technology.</li><li>● Support the agglomeration of the biopharmaceutical industry, encouraging the clustering of innovative medical device companies and leading biopharmaceutical enterprises.</li></ul> <p><b>Yizhuang Cluster</b></p> <ul style="list-style-type: none"><li>● Build next-generation information technology industry clusters with global influence.</li><li>● Prioritize supporting collaborative R&amp;D between enterprises, universities, and research institutes in pioneering processes for integrated circuits, next-generation display technologies, and related fields.</li><li>● Support the development of new energy and high-end automobile industries, robots and advanced intelligent equipment industries.</li></ul>

At the same time, Beijing also owns 9.97 square kilometers of the Daxing Airport Area of the China (Hebei) Pilot Free Trade Zone (Beijing Daxing).

## » **High-grade, Precision and Advanced Industries**

During the 14th Five-Year Plan period, Beijing has continuously intensified investment and strategic deployment in high-grade, precision and advanced industries through a "combined approach" of policy guidance, targeted incentives, and proactive services. The revenues of the ten key high-grade, precision and advanced industrial clusters have all exceeded 100 billion yuan, achieving an "accelerated" innovative advancement and sustained strengthening of high-end growth momentum.

### **Electronic Information Industry**

#### **Industrial advantages**

- The integrated circuit industry has a high degree of concentration, a complete industrial chain, and leading comprehensive technical capabilities.
- The radiation and driving capabilities of the ultra-high-definition video and new display industries are gradually improving.
- The virtual reality industry ranks first in the country in terms of technological innovation capabilities, with significant industrial clustering and demonstration effects.

#### **Key areas**

- Integrated circuits: the entire industrial chain including design, manufacturing, packaging and testing, equipment, components and materials.
- Ultra-high-definition video and new displays: upstream research and development, downstream brand marketing.
- Virtual reality (VR/AR): core hardware, complete devices, interaction technologies, software technologies, content, and applications.

#### **Key layout**

- Beijing Economic-Technological Development Area: covers the entire industrial chain including "design, manufacturing, packaging and testing".
- Haidian District: mainly develops the integrated circuit design industry, covering pan-IC design fields such as blockchain and artificial intelligence.
- Shijingshan District: Virtual reality industrial cluster.

## Pharmaceutical and Health Industry

### Industrial advantages

- Rich innovative R&D resources and clinical resources, with leading capabilities in novel vaccines, next-generation antibody drugs, and related fields.
- The pharmaceutical manufacturing has consistently led the country for many years.

### Key areas

- Innovative medical devices: high-end medical equipment, cell and gene therapy, etc.
- New vaccines, next-generation antibody drugs, cell and gene therapy.

### Key layout

- Haidian District, Daxing District, Changping District, Beijing Economic-Technological Development Area: forming a "North-South, Distinctive" spatial layout for the biopharmaceutical industry.

## Automobile and Transportation Industry

Beijing is a major hub for China's automotive innovation and an important production base. The industry is rapidly advancing toward electrification, intelligence, connectivity, and lightweight development—key high-tech directions—and has initially established a nationally leading new-energy intelligent connected vehicle industrial system.

### Industrial advantages

- The Beijing-Tianjin-Hebei automobile industry cluster possesses a complete industrial chain competitive advantage and leading autonomous driving technology.

### Key areas

- Intelligent connected vehicles: whole-vehicle manufacturing, intelligent connectivity infrastructure and core components, and smart travel services.

### Key layout

- Beijing Economic-Technological Development Area, Shunyi District, Fangshan District, etc.

## Intelligent Equipment industry

### Industrial advantages

- Mobile manipulator robots, orthopedic surgical robots, precision reducers and other high-end products are leading in the country.
- Machine tools demonstrate advanced technology, covering a relatively complete product spectrum from heavy/large to small/medium sizes.

### Key areas

- Robots: humanoid robots, industrial robots, service robots, etc.
- Machine tools: high-end CNC machine tools, intelligent manufacturing equipment, etc.

### Key layout

- Zhongguancun (Yizhuang) International Robot Industrial Park, Beijing Future Science City (Changping) Robot Industrial Park, etc.

## Materials and Green Energy industry

### Industrial advantages

- Hydrogen energy technology research leads nationally, with strong R&D capabilities in new energy storage technologies.
- Smart energy industry has large-scale operations, primarily driven by central and municipal state-owned enterprises.

### Key areas

- Hydrogen energy: liquid hydrogen storage, solid hydrogen storage, etc.
- New energy storage: solid-state batteries, sodium ion batteries, flow batteries, etc.
- Smart energy: comprehensive smart energy services.

### Key layout

- Daxing International Hydrogen Energy Demonstration Zone, Zhongguancun (Fangshan) Hydrogen Energy Industrial Park, Future Science City "Energy Valley", etc.

## Aerospace Industry

### Industrial advantages

- The commercial aerospace industry covers all segments such as satellite manufacturing and rocket manufacturing , with a distinctive industrial chain.

### Key areas

- Commercial aerospace: satellite manufacturing, rocket manufacturing, ground equipment manufacturing, etc.
- Low-altitude technology: UAV R&D, manufacturing, application, etc.

### Key layout

- Beijing Commercial Aerospace Industry Base, Beijing Rocket Street, Zhongguancun (Yanqing) Low-altitude Economic Industrial Park, etc.

## Digital Economy Industry

### Industrial advantages

- The scale of digital economy is expanding steadily, with abundant computing resources and leading development in Web 3.0 and large-scale AI models.

### Key areas

- Internet 3.0: artificial intelligence, blockchain, network communication, virtual reality, etc.
- Artificial intelligence (large models): ERNIE Bot, Zhipu Qingyan, etc.
- Computing power centers: Beijing's local computing power exceeds 20,000 P, and the computing power resources gathered in and outside Beijing exceed 50,000 P.

### Key layout

- Haidian District, Chaoyang District, Mentougou District, etc.

## Information Software Industry

### Industrial advantages

- The basic software industry covers the entire technology industry chain, and industrial software plays an important role in the fields of industrial Internet and intelligent manufacturing.

### Key areas

- Basic software: chips, operating systems, databases, middleware, etc.
- Industrial software: industrial Internet platform, intelligent manufacturing solutions, etc.

### Key layout

- Zhongguancun Software Park, Zhongguancun Industrial Internet Industrial Park, Beijing Economic-Technological Development Area National Information Technology Innovation Park, etc.

## Urban Industry

### Industrial advantages

- High industrial concentration in food, apparel, and smart home sectors, with numerous time-honored brands.

### Key areas

- Food industry: time-honored food brands, modern food manufacturing, etc.
- Clothing industry: high-end clothing, fashion design, etc.
- Smart home: smart home appliances, intelligent security systems, etc.

### Key layout

- Zhongguancun Huairou Park, Zhongguancun Pinggu Park, Gongmei Juyi Park, etc.

## Future Industries

### Industrial advantages

- As a national science and technology innovation center, Beijing has become a benchmark city for the development of future industries in China, relying on its comprehensive advantages such as policy system, technology accumulation, and industrial ecology.

### Key areas

- Future information: general artificial intelligence, sixth-generation mobile communications (6G), metaverse, etc.
- Future health: genetic technology, synthetic biology, cell therapy and regenerative medicine, etc.
- Future manufacturing: humanoid robots, smart travel, etc.
- Future energy: hydrogen energy, new energy storage, carbon capture and storage, etc.
- Future materials: graphene materials, fourth-generation semiconductor materials, new generation biomedical materials, etc.
- Future space: commercial aerospace, satellite network, etc.

### Key layout

- Haidian District, Mentougou District, Beijing Economic-Technological Development Area, Shijingshan District, Chaoyang District and other regions will layout future industries according to their respective advantages.

## » Modern Service Industry

As the national political center, technological innovation center and international exchange center, Beijing is accelerating the construction of a modern service industry system with financial services, information services, technological services, business services and life services as the core, through building the "Two Zones", and is committed to building a global digital economy benchmark city and an international high-end service hub. The modern service industry has become the main engine driving Beijing's economic growth.

### Financial Services

#### Key areas

- Modern financial services: including cultural finance, trade finance, auto finance, financial leasing, etc.
- Financial technology innovation: support domestic and foreign financial institutions to set up technology subsidiaries, financial technology divisions, etc., and attract technology companies to set up financial technology R&D centers.

#### Key layout

- Chaoyang Cluster: focus on the development of cultural finance, trade finance, auto finance and financial leasing industries.
- Shunyi Cluster: support the establishment of legal person financial institutions such as Sino-foreign joint venture banks, private banks, insurance, securities, public funds, and develop innovative businesses such as technology leasing.
- Tongzhou Cluster: focus on financial formats such as wealth management, green finance, and financial technology, and attract domestic and foreign green financial institutions to cluster.

## Information Services

### Key areas

- New generation information technology: including artificial intelligence, industrial Internet, big data, cloud computing, etc.

### Key layout

- Haidian Cluster: support the development of artificial intelligence industry, intelligent connected vehicle industry, game and e-sports industry, and financial sector.
- Changping Cluster: take the lead in the layout of new generation information technology and its derivative fields, and develop industries such as intelligent manufacturing and equipment industries.
- Yizhuang Cluster: focus on building a new generation of information technology industry cluster with global influence, and support leading process research and development in the fields of integrated circuits, next-generation display technology, etc.

## Science and Technology Services

### Key areas

- Science and Technology R&D and Innovation: including entrepreneurship incubation, technology transfer and commercialization, science and technology consulting, intellectual property services, etc.

### Key layout

- Haidian Cluster: advantageous industries mainly based on scientific research and technical services, information transmission, software and information technology services.
- Changping Cluster: leverage leading enterprises like Xiaomi Group and Sany Group to cultivate high-end digital industrial clusters based on next-generation information technologies.
- Yizhuang Cluster: support enterprises to carry out leading process research and development in conjunction with universities and research institutes, and drive the iteration and upgrading of underlying technologies and demonstration applications.

## Business Services

### Key areas

---

- Business Services: including design, consulting, exhibitions, e-commerce, etc.

### Key layout

---

- Chaoyang Cluster: Encourage enterprises in the fields of legal services, accounting and auditing, evaluation services, and human resources services to establish operations.
- Shunyi Cluster: relying on the National Foreign Cultural Trade Base, focus on the development of high-end industries such as cultural media, audio-visual, game and animation copyrights, and creative design.
- Tongzhou Cluster: develop high-end service clusters centered around the Grand Canal Business District and Zhangjiawan Design Town.

## Life Services

### Key areas

---

- Life supporting services: including leisure tourism, cultural entertainment, health/elder care, sports events, etc.

### Key layout

---

- All districts have layouts

## » Cultural Industry

Beijing adheres to the development philosophy of "technology empowering culture, culture empowering the city". Driven by supply-side structural reforms in the cultural sector, the city is accelerating the establishment of a high-end, precision, and advanced cultural industry system, achieving rapid progress in high-quality cultural industry development.

2024	
<b>Total revenue of cultural and related industry legal entities above designated size</b> <b>2302.26</b> billion yuan <small>同比增长 2.3%</small>	<b>Year-on-year growth</b> <b>6.6%</b> ↑
<b>Operating revenue of new cultural formats</b> <b>1590.69</b> billion yuan <small>同比增长 11.1%</small>	<b>Year-on-year growth</b> <b>11.1%</b> ↑ <small>Accounting for 70.7% of the city's cultural enterprises' operating revenue</small>

### Key areas

- Cultural trade: including trade activities in cross-border e-commerce, cultural copyright, digital medicine and other fields.
- Cultural creativity: covering sub-sectors such as creative design, digital content, original animation, and copyright operation.

### Key layout

- Chaoyang Cluster: focus on supporting the introduction and cultivation of high-quality cultural enterprises, the integration of culture and technology, the integration of culture and tourism, the development of new cultural consumption formats, the quality development of cultural industrial parks, and the innovation of cultural finance and other services in "four directions".
- Shunyi Cluster: leverage the National Base for Cultural Trade (Beijing) to develop high-end industries such as cultural media, audiovisual, gaming/animation copyright, and creative design. Relying on functional areas such as the New China International Exhibition Center to attract more professional, emerging, and international exhibitions to settle down, and promote the internationalization of cultural trade.
- Tongzhou Cluster: focus on the development of cultural and creative trade, focusing on creative design, digital content, original animation, copyright operation and other fields. Linking upstream and downstream enterprises in the design industry, creating an international design product display experience and exchange trade center, and enhancing the international influence of Beijing's cultural and creative industries.

# INVESTMENT AREAS

## Zhongguancun National Independent Innovation Demonstration Zone

Built in 1988, the Zhongguancun National Independent Innovation Demonstration Zone (Zhongguancun Science Park) boasts a planned area of 488 square kilometers. It is China's first national-level high-tech industrial development area. After more than 30 years of development, the park has become a cross-administrative-district high-end industrial functional area with "one zone and multiple sub-parks".

### Beijing Science and Technology Commission, Zhongguancun Science and Technology Park Management Committee

 9 Hong'an Street, Tongzhou District, Beijing

 +86. 10 55577777

 +86. 10 55577700

 <https://kw.beijing.gov.cn/>

## Zhongguancun Science City

The Zhongguancun Science City, which has a total area of approximately 174 square kilometers, is the core area of the Zhongguancun National Independent Innovation Demonstration Zone. There are 36 national key universities and colleges, such as Tsinghua University and Peking University, more than 96 research institutes, including the Chinese Academy of Sciences, 32 national engineering technology research centers. It also brings together more than 10,000 high-tech companies. The Zhongguancun Science City focuses on promoting the integration of technology and industry, technology and finance, as well as technology and culture.

### Management Committee of Zhongguancun Science City

 6 Sijiqing Road, Haidian Merchants Building, Haidian District, Beijing

 +86. 10 88499599

 +86. 10 88494199

 <https://www.bjhd.gov.cn/qyfw/index>

### Future Science City

With a planned area of 170.5 square kilometers, the Future Science City is located in the southern part of Beijing's Changping District. It focuses on innovations in the fields of "advanced energy, advanced manufacturing, medical and health." It serves as a platform that strengthens the interaction with existing industrial functional areas, collaborative innovation of the centrally-run state-owned enterprises, universities, institutes and innovative enterprises, and convergence of technological researches, intellectual property rights and financial laws.

### Huairou Science City

With an allocated area of 100.9 square kilometers, the Huairou Science City is located in the core area of Huairou and Miyun districts in the northeast Beijing. The park focuses on the incubation of achievements in the five scientific directions of matter, space, earth system, life and intelligence. It aims to cultivate high-grade, precision and advanced industries such as science and technology services industry, new materials, life and health, intelligent information and precision instruments, space and Earth exploration, energy conservation and environmental protection, and build an innovative cycle of "infrastructure – basic research – applied research – technological development – research achievement transformation –high-precision industry."

### Beijing Economic-Technological Development Area

The planned area of Beijing Economic-Technological Development Area is 225 square kilometers. By leveraging "convergence" to drive "transformation," it aims to optimize industrial structure and elevate urban development capacity, forming a "44637" development framework. Specifically, this framework is guided by four national strategies (building a national integrated circuit industry highland, cultivating the world's premier high-level autonomous driving demonstration zone, developing a high-quality national information and innovation industry base, and establishing a top-tier pilot zone for national data infrastructure). It consolidates and expands four leading industries (the new generation information technology industry, the new energy vehicles and intelligent connected vehicles industry, the biotechnology and big health industry, and the robots and intelligent manufacturing industry). Additionally, it comprehensively deploys six future industries (future information, future health, future manufacturing, future energy, future materials, and future space), strengthens three integration empowerments (digital-real economy integration, advanced manufacturing-modern services integration, and science-culture integration), and builds seven support systems (industrial organization, innovation cultivation, factor guarantee, talent service, open collaboration, urban vitality, and party-building leadership).

### Beijing Tianzhu Comprehensive Bonded Zone

Approved by the State Council (Letter of State [2008] No.64) on July 23, 2008, Beijing Tianzhu Comprehensive Bonded Zone, with a total planned area of 5.457 square kilometers, is China's first comprehensive bonded trade zone relying on an airport, and was officially approved as a national import trade promotion innovation demonstration zone on November 3, 2022. The Beijing Tianzhu Comprehensive Bonded Zone serves as the key platform for the capital's global engagement and is developing into a comprehensive bonded zone that emphasizes service trade.

#### Management Committee of Beijing Tianzhu Free Trade Zone

 Building 2, Compound 1, Jinhang Zhonglu, Shunyi District, Beijing

### Beijing Daxing International Airport Comprehensive Bonded Zone

The Beijing Daxing International Airport Comprehensive Bonded Zone is jointly constructed, managed, and operated by Beijing, Hebei, and the Capital Airports Holdings. It is China's only cross-provincial comprehensive bonded zone benefiting from the superimposed high-level policies of "three zones, two regions". It plans to develop a "4+N" industrial system that includes international logistics and supply chain management, the aviation industry, medical health, and new-generation information technology, along with N innovative formats.

Yufa Town, Daxing District, Beijing

🌐 <https://www.bjdx.gov.cn/bjsdxqrmzf/zwfw/ztlm/tzdx/yyyq/lkjjq/index.html>

### Beijing Zhongguancun Comprehensive Bonded Zone

The Beijing Zhongguancun Comprehensive Bonded Zone is the first comprehensive bonded zone in the country focused on R&D and innovation, the first to eliminate physical barriers, and the first to explore smart supervision models. It aims to establish a "2+2+N" bonded business matrix, with the integrated circuit industry and the pharmaceutical and health industry as its core, and the artificial intelligence industry and science and technology service industry as focal points, thereby expanding to include N bonded service formats.

### Beijing Yizhuang Comprehensive Bonded Zone

The Beijing Yizhuang Comprehensive Bonded Zone was officially approved by the State Council on September 7, 2024. It is located in the Changziying Industrial Zone of Yizhuang New Town, within the Beijing Economic-Technological Development Area. This zone falls within the National Comprehensive Demonstration Zone for Expanding the Opening of the Service Industry and the National High-tech Development Zone, covering a planned area of 0.61 square kilometers, encompassing a single block. The Yizhuang Comprehensive Bonded Zone focuses on a "4+N" bonded industry positioning, emphasizing new generation information technology, new energy vehicles, biomedicine, and high-end equipment manufacturing. It aims to create N service trade industry systems and actively cultivate one-stop supply solutions for industrial products and large-scale equipment financing and leasing platforms to support the development of high-tech industry bonded service trade.

## Beijing Sino-Japanese Innovation Cooperation Demonstration Zone

The Beijing Sino-Japanese Innovation Cooperation Demonstration Zone was formally approved and established by the National Development and Reform Commission in October 2020. It is positioned for the development of international scientific and technological collaborative innovation and industrial cooperation. It is the first and only Sino-Japanese demonstration zone themed on innovation cooperation. The demonstration zone is located along the extension of Beijing's south central axis, between the fifth and sixth ring roads, on both sides of the Beijing-Taiwan Expressway, adjacent to Daxing New Town and Yizhuang New Town. The demonstration zone takes medicine and health, advanced intelligent manufacturing, and digital economy as its leading industries, and strives to create two-way openness, fairness, transparency and non-discriminatory innovation environment in terms of intellectual property protection, relaxation of industry access, promotion of cross-border trade facilitation, optimization of foreign exchange supervision, and provision of talent protection. It strives to become a new carrier of two-way exchanges and cooperation between China and Japan, new model of innovative development cooperation, new cluster of high-end industry development and new highland for reform and opening-up in the capital.

### Beijing Sino-German Economic and Technological Cooperation Pilot Demonstration Zone

Beijing Sino-German Economic and Technological Cooperation Pilot Demonstration Zone was approved and established by the National Development and Reform Commission in June 2021. It is located in Shunyi District. It enjoys advantages in airport location, solid manufacturing foundation, leading reform and innovation platform, and supporting facilities, thanks to a solid foundation for Sino-German cooperation for in-depth all-round cooperation. The demonstration zone originated from the 20-square-kilometer Beijing Sino-German International Cooperation Industrial Park, with an expansion of the "Two Zones" as the core, linking the Beijing Capital International Airport, the New International Exhibition Center, the Central Villa Zone, Xiangyun Township, Meritor Industrial Park and other living and production facilities for diversified development. It can influence 100 square kilometers of Beijing Innovation Industry Cluster Demonstration Zone (Shunyi) in the future.

# INDUSTRIAL PLANNING

## **Development Plan of the High-grade, Precision and Advanced Industry in Beijing During the "14th Five-Year Plan" Period (Beijing Government Notice [2021] No.21)**

*The "Development Plan" proposes that by 2025, the added value of Beijing's high-grade, precision and advanced industries will account for more than 30% of the regional GDP, the number of trillion-level industrial clusters will be 4 to 5, and the added value of the manufacturing industry will account for 13% of the regional GDP, and striving to reach 15%, the revenue of the software and information service industry will reach 3 trillion yuan, and the number of new advanced manufacturing enterprises above designated size will reach 500.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202108/t20210818\\_2471375.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202108/t20210818_2471375.html)

## **【Policy interpretation】 Graphic overview: Development Plan of the High-grade, Precision and Advanced Industry in Beijing During the "14th Five-Year Plan" Period**

[https://www.beijing.gov.cn/zhengce/zcjd/202108/t20210819\\_2471491.html](https://www.beijing.gov.cn/zhengce/zcjd/202108/t20210819_2471491.html)

**Several Measures on Promoting Investment in High-grade, Precision and Advanced Industries to Promote High-end Intelligent Green Development of Manufacturing in Beijing Municipality (Beijing Government Notice [2021] No.25)**

*The "Several Measures" clearly state that Beijing encourages private, foreign-funded enterprises and state-owned enterprises to actively invest in high-grade, precision and advanced industries that are in line with the strategic positioning of the capital city, expand the two international leading pillar industries of a new generation of information technology and medical and health, and build strong integrated circuits, intelligent networked vehicles, intelligent manufacturing and equipment, green energy, energy conservation and environmental protection, and other "Beijing Intelligent Manufacturing" characteristic advantageous industries, take the lead in deploying future cutting-edge industries in the fields of optoelectronics, cutting-edge new materials, and quantum information.*

*[https://www.beijing.gov.cn/zhengce/zhengcefagui/202109/t20210909\\_2489260.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202109/t20210909_2489260.html)*

**【Policy interpretation】 Beijing introduces new policies for high-grade, precision and advanced manufacturing industries - "Beijing Intelligent Manufacturing" characteristic advantageous industries and taking the lead in laying out future cutting-edge industries**

*[https://www.beijing.gov.cn/zhengce/zcjd/202110/t20211011\\_2509441.html](https://www.beijing.gov.cn/zhengce/zcjd/202110/t20211011_2509441.html)*

**Beijing Municipality "New Intelligent Manufacturing 100" Project Implementation Plan (2021-2025)" (Beijing Economic and Information Notice [2021] No.81)**

*The "Implementation Plan" proposes that by 2025, the digital and intelligent transformation and upgrading of manufacturing enterprises above designated size will basically achieve full coverage, and intelligent manufacturing will shift from leading applications in advantaged enterprises to widespread adoption in SMEs, leading to an overall improvement in the competitiveness of the manufacturing industry. Beijing's new experiences, new solutions, and new models in intelligent manufacturing will have a significant global impact, and the scale of the intelligent manufacturing industry cluster in the city will exceed 1 trillion yuan.*

*[https://www.beijing.gov.cn/zhengce/zhengcefagui/202108/t20210831\\_2480277.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202108/t20210831_2480277.html)*

**Notice of the General Office of the People's Government of Beijing Municipality on the Issuing the "Guiding Opinions on Promoting the Innovative Development of Science and Technology Business Incubators in Beijing" (Beijing Government Notice [2023] No.26)**

*The "Guiding Opinions" propose that by the end of 2027, a gradient and interconnected entrepreneurial incubation system will be formed in the city, with benchmark incubators demonstrating leadership, municipal-level technology enterprise incubators providing backbone support, and other technology enterprise incubators offering comprehensive functions. The level of professionalization, value creation, and internationalization of incubators will be significantly improved, forming incubation capabilities that match the construction of the Beijing International Science and Technology Innovation Center; Significant progress will be made in the construction of an international incubation service network, forming a globally influential open innovation ecosystem, promoting the free flow of innovative and entrepreneurial elements across regions, and further unleashing innovation and entrepreneurial vitality; A number of high-level hard-tech enterprises, such as national high-tech enterprises, specialized, sophisticated, unique, and innovative enterprises, and unicorn companies, will continue to emerge, and a group of high-energy, high-grade, precision and advanced clusters and several world-leading future industrial clusters will be initially formed, effectively promoting the city to become a global highland for innovation and entrepreneurship in hard-tech industries.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202312/t20231218\\_3503041.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202312/t20231218_3503041.html)

**【Policy interpretation】 Promote the construction of science and technology business incubators and create an open innovation ecosystem with global influence, with a number of future industrial clusters initially formed by 2027**

[https://www.beijing.gov.cn/zhengce/zcjd/202312/t20231220\\_3505333.html](https://www.beijing.gov.cn/zhengce/zcjd/202312/t20231220_3505333.html)

**Notice of the Beijing Municipal Bureau of Economy and Information Technology on Issuing the "Implementation Plan for the Construction of a Scientific and Technological Innovation System for High-grade, Precision and Advanced Industries in Beijing" (Beijing Economic and Information Notice [2023] No.30)**

*The "Implementation Plan" proposes that by 2025, 500 outstanding enterprise technology centers in high-grade, precision and advanced industries will be established; 30 key product breakthroughs will be achieved; 5 high-grade, precision and advanced industry innovation centers and 10 pilot service platforms will be created in 10 high-grade, precision and advanced industrial fields, cultivating around 50 municipal-level leading enterprises in the industrial chain.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202309/t20230901\\_3241013.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202309/t20230901_3241013.html)

**【Policy interpretation】 One image for full understanding: Implementation Plan for the Construction of a Scientific and Technological Innovation System for High-grade, Precision and Advanced Industries in Beijing**

**Notice of the Beijing Municipal Bureau of Economy and Information Technology on Issuing the "Several Policy Measures on Accelerating the Building of an Information Technology Application Innovation Industry Highland in Beijing" (Beijing Economic and Information Notice [2023] No.16)**

*The "Measures" clarified ten major policies. These include supporting the listing of innovative and creative enterprises, improving the efficiency of listing and trading of "specialized, sophisticated, unique, and innovative" and "little giant" enterprises on the Beijing Stock Exchange and other trading markets, and providing subsidies from both the city and district levels to innovative and creative enterprises listed on the Beijing Stock Exchange and other trading markets.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202305/t20230511\\_3092996.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202305/t20230511_3092996.html)

**【Policy interpretation】 An industrial chain covering all fields accelerates the "forging" of ten measures to create a highland for the ITAI (information technology application innovation) industry**

[https://www.beijing.gov.cn/zhengce/zcjd/202305/t20230511\\_3092998.html](https://www.beijing.gov.cn/zhengce/zcjd/202305/t20230511_3092998.html)

**Notice of the General Office of the People's Government of Beijing Municipality on the Issuing the "Implementation Plan for Promoting Future Industrial Innovation and Development in Beijing" (Beijing Government Office Notice [2023] No.20)**

*The "Implementation Plan" proposes that by 2030, a number of disruptive technologies and major original achievements will be developed, along with the establishment of application scenarios, pilot platforms, and technical standards, aiming to cultivate a number of industry-leading enterprises, unicorn companies, and build innovation centers and innovation alliances, and seeking to nurture and attract a batch of strategic scientists, industry leaders, industry managers, and outstanding engineers.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202309/t20230908\\_3255227.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202309/t20230908_3255227.html)

**【Policy interpretation】 Beijing has laid out 20 future industries and strives to become a global leader in future industry development by 2035**

[https://www.beijing.gov.cn/zhengce/zcjd/202309/t20230911\\_3255463.html](https://www.beijing.gov.cn/zhengce/zcjd/202309/t20230911_3255463.html)

**Notice of the Beijing Municipal Bureau of Economy and Information Technology on Issuing the "Several Measures to Promote the Innovative Development of the Robot Industry in Beijing" (Beijing Economic and Information Notice [2023] No.46)**

*The "Several Measures" mention that the city will establish a 10-billion-yuan fund for the robotics industry to support the incubation of innovative teams, the transformation of technological achievements, and corporate mergers, acquisitions, reorganizations and development of companies. In terms of improving the innovation capabilities of key robotic technologies, enterprises will be supported to form consortia to collectively address the weaknesses and technical challenges of the robotics industry through a "competition-based leadership" approach, and will be provided with a support of up to 30 million yuan based on investment in research.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202308/t20230817\\_3224212.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202308/t20230817_3224212.html)

**【Policy interpretation】 Beijing has issued 16 measures to promote the innovative development of the robotics industry, establishing an industrial fund of 10 billion yuan, with a maximum support of 30 million yuan for enterprises to tackle key technologies**

[https://www.beijing.gov.cn/zhengce/zcjd/202308/t20230817\\_3224217.html](https://www.beijing.gov.cn/zhengce/zcjd/202308/t20230817_3224217.html)

### **Beijing General Artificial Intelligence Industry Innovation Partnership Plan**

*The "Plan" proposes that by 2025, a general artificial intelligence industry development pattern will be basically formed with complete elements, leading technology, and complete ecology, which can effectively support the high-quality development of the digital economy. The layout of the upstream and downstream industrial chains will continue to be optimized, with significantly improved capabilities in providing high-quality computing power and data supply, and innovative applications of large-scale models will lead the nation. For every year, more than 10 key scene commercial benchmark applications and 10 industry benchmark solutions will be launched and formed, cultivating a group of benchmark enterprises achieving breakthrough growth through the application of large-scale model technologies, and a highland for the development of the general artificial intelligence industry with international influence will be built.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202305/t20230524\\_3111706.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202305/t20230524_3111706.html)

### **【Policy interpretation】 Accelerate the implementation of the large model industry! Beijing launches this partnership plan**

[https://www.beijing.gov.cn/zhengce/zcjd/202312/t20231226\\_3512265.html](https://www.beijing.gov.cn/zhengce/zcjd/202312/t20231226_3512265.html)

### **Notice from the Beijing Municipal Bureau of Economy and Information Technology and Five Other Departments on Issuing the "Implementation Plan for Implementing the 'Opinions on Improving the Reliability of the Manufacturing Industry' in Beijing" (Beijing Economic and Information Notice [2023] No.93)**

*The "Implementation Plan" proposes that by 2025, the reliability level of key core products in the city's key industries will be significantly improved, the quality and reliability management capabilities of enterprises will continue to be enhanced, the reliability test verification capabilities will be greatly improved, and the professional talent team will continue to grow. More than 10 typical demonstrations of reliability improvement will be established, promoting over 100 companies to implement reliability enhancement measures. The reliability of core components and basic parts will effectively support the reliability of the entire equipment. The resilience of the industrial chain and supply chain will be significantly enhanced.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202311/t20231124\\_3309094.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202311/t20231124_3309094.html)

### **【Policy interpretation】 One image for full understanding: "Implementation Plan for Implementing the 'Opinions on Improving the Reliability of the Manufacturing Industry' in Beijing"**

**Notice of the Beijing Municipal Bureau of Economy and Information Technology on Issuing the "Several Policy Measures to Support the Development of New Energy Storage Industry in Beijing " (Beijing Economic and Information Notice [2023] No.94)**

*New energy storage is an important technology and essential equipment for building a new power system. It is a crucial support for achieving carbon peak and carbon neutrality goals, as well as an important field for fostering new energy industries domestically and seizing strategic high grounds internationally. The "Several Policy Measures" aims to implement the "Development Plan for High-grade, Precision and Advanced Industries During the '14th Five-Year Plan' Period in Beijing ", and seize industrial development opportunities, integrate resource advantages, promote the city's new energy storage technology innovation and industrial development, while effectively support the construction of an international science and technology innovation center.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202311/t20231127\\_3309864.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202311/t20231127_3309864.html)

**【Policy interpretation】 One image for full understanding: "Several Policy Measures to Support the Development of New Energy Storage Industry in Beijing"**

# FOREIGN INVESTMENT

## Foreign Investment Law of the People's Republic of China (Order of the President of the People's Republic of China No.26)

*The law clarifies that "the state implements national treatment for foreign investment before access" and "negative list management system." It abolishes the case-by-case approval management mode, establishes a foreign investment information reporting system, standardizes the investment promotion and investment protection system. It makes clear regulations on the issues that foreign investors are concerned about, such as money remitting, protection of intellectual property rights, non-compulsory technology transfer and local government's fulfillment of agreement. It provides clear guidance for the governments and institutions to promote foreign investment in accordance with the law. The regulations came into force on January 1, 2020.*

### **【Policy interpretation】 27 measures to support the growth of specialized, sophisticated, unique, and innovative enterprises in terms of improving scientific and technological innovation capabilities, fiscal and taxation support, etc**

[https://www.beijing.gov.cn/zhengce/zcjd/202411/t20241129\\_3952465.html](https://www.beijing.gov.cn/zhengce/zcjd/202411/t20241129_3952465.html)

# CONSTRUCTION OF "TWO ZONES"

## CONSTRUCTION OF "TWO ZONES"

### **Work Plan to Support Beijing in Deepening the Construction of a Comprehensive Demonstration Zone for the Expansion and Opening-up of the National Service Industry (Letter of State [2023] No.130)**

*The State Council approved the "Work Plan to Support Beijing in Deepening the Construction of a Comprehensive Demonstration Zone for the Expansion and Opening-up of the National Service Industry" (referred to as the Demonstration Zone 2.0 Plan). The Demonstration Zone 2.0 Plan is an iteration of the Demonstration Zone 1.0 Plan launched in 2020, pointing out the direction for Beijing to promote high-level opening up in the next stage. It has launched a new round of pilot measures in the demonstration zone, which will help to better coordinate the relationship between overall planning and local pilots, give full play to the pilot and stress testing role of the demonstration zone, and accurately align with international high-standard economic and trade rules, which shall promote the establishment of a high-standard open institutional system for the service industry.*

- ◎ *Promote the deepening reform and expansion of opening up in key areas of the service industry*
- ◎ *Explore the rules and regulations of emerging business formats*
- ◎ *Optimize trade and investment institutional arrangements*
- ◎ *Improving the public service policy environment*
- ◎ *Strengthen rights protection mechanism*
- ◎ *Establish a sound risk prevention and control system*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/202403/t20240325\\_3600302.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/202403/t20240325_3600302.html)

### **Overall Plan of China (Beijing) Pilot Free Trade Zone (State Notice [2020] No.10)**

*The "Overall Plan" clarifies that the scope of implementation of the Beijing Pilot Free Trade Zone is 119.68 square kilometers, covering 3 areas, namely, a science and technology innovation area, an international business service area, and a high-end industrial area. The science and technology innovation area focuses on the development of new generation of information technology, biology and health, science and technology services and other industries, and builds a digital economy pilot zone, a global venture capital center, and a pilot demonstration zone for scientific and technological system reform; the international business service area focuses on the development of digital trade, cultural trade, and business exhibition, medical and health, international delivery logistics, cross-border finance and other industries, creating a pilot area for airport economic innovation; the high-end industrial area focuses on the development of business services, international finance, cultural creativity, biotechnology and general health industries, and shall build sites for the transformation of scientific and technological achievements, strategic emerging industry clusters, and international high-end functional institutions clusters.*

# TALENT DEVELOPMENT

## Several Measures of Optimizing Talent Service, Promoting Scientific and Technological Innovation and Promoting the Development of High-grade, Precision and Advanced Industries (Beijing Government Notice [2017] No.38)

*The "Several Measures" clarify that all scientific and technological innovation talents, cultural and creative talents, financial management talents, patent inventors who meet the development direction of Beijing's high-grade, precision and advanced industries and meet certain conditions, as well as talents in urgent need in this city, can apply for the introduction of Beijing, and high-level domestic talents can complete the introduction procedures within five working days as soon as possible.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/201905/t20190522\\_60682.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/201905/t20190522_60682.html)

### 【Policy interpretation】 High-level domestic talents can be introduced in just 5 days

[https://www.beijing.gov.cn/zhengce/zcjd/201905/t20190523\\_78467.html](https://www.beijing.gov.cn/zhengce/zcjd/201905/t20190523_78467.html)

## Management Measures for Introducing Talents in Beijing (Trial) (Beijing Personnel Notice [2018] No.38)

*The "Management Measures (Trial)" aims to increase the introduction of seven types of talents, including technological innovation, cultural creativity, sports, international exchange center construction, finance, education and medical care, and high-skilled talents. It aims to establish a "green channel" for the introduction of outstanding talents, and at the same time establish a channel for the introduction of freelancers, and all qualified talents can apply for the introduction procedures.*

[https://www.beijing.gov.cn/zhengce/zhengcefagui/201905/t20190522\\_60895.html](https://www.beijing.gov.cn/zhengce/zhengcefagui/201905/t20190522_60895.html)

### 【Policy interpretation】 Establishment of a channel for introducing freelancers

# CREATE A WORLD-CLASS BUSINESS ENVIRONMENT

In recent years, Beijing has made optimizing the business environment a key strategy for transforming government functions and fostering high-quality development in the capital, and persisted in overcoming difficulties and deepening reforms:

It has successively released reform plans from version 1.0 to 6.0, implementing over 1,270 reform measures. These efforts have transformed Beijing's business environment from "following" to "leading," achieving remarkable results that are widely recognized. As a result, China has seen a notable rise in its ranking in the World Bank's business environment assessment, with Beijing maintaining its position as a national leader in the business environment evaluation for three consecutive years.

## » Legislation optimization, Beijing continues to optimize the business environment

### An important institutional basis for optimizing the business environment in Beijing

#### **Regulation of Beijing Municipality on Optimizing the Business Environment**

*Adopted at the 20th meeting of the Standing Committee of the 15th Beijing Municipal People's Congress on March 27, 2020; Amended for the first time in accordance with the "Decision on Amending the Regulations on Optimizing the Business Environment in Beijing Municipality" adopted at the 42nd meeting of the Standing Committee of the 15th Beijing Municipal People's Congress on August 29, 2022; Amended for the first time at the 13th meeting of the Standing Committee of the 16th Beijing Municipal People's Congress on November 29, 2024. The revised "Regulations" require the introduction or update of more than 40 supporting policies and measures, involving more than 30 units such as the Municipal Market Supervision Bureau, the Municipal Government Affairs and Data Bureau, and the Municipal Financial Management Bureau.*

## Beijing Business Environment Reform Version 6.0

### **Implementation Plan for Comprehensively Optimizing the Business Environment and Supporting High-Quality Development of Enterprises in Beijing (Beijing Government Notice [2023] No.8)**

*The "Implementation Plan" includes 237 reform tasks, including efforts to create a market environment for fair competition, focusing on creating a legal environment with good laws and good governance, proactively creating an open and inclusive investment and trade environment, comprehensively creating a convenient and efficient government environment and jointly creating a first-class business environment in the Beijing-Tianjin-Hebei region. The overall goal of the 6.0 version of the reform is to promote key areas of reform with greater intensity, achieving a shift from "quantitative change" to "qualitative change," significantly enhancing the sense of achievement for enterprises, and supporting the better and faster development of various types of entities.*

## Improve cross-border trade facilitation

### **Notice of the Beijing Customs on Issuing the "27 Specific Measures for Optimizing the Business Environment by Beijing Customs" (Beijing Customs Notice [2023] No.54)**

*The "Specific Measures" launched 27 specific measures to optimize the business environment in five aspects, including accelerating the smooth circulation of industrial and supply chains, improving cross-border trade facilitation, enhancing the competitiveness of Beijing's foreign trade industry, promoting enterprises to reduce costs and increase efficiency, and creating a new high-level open platform, aiming to promote the marketization, rule of law, and internationalization of the business environment at Beijing's ports.*

## The reform of "separation of permits and licenses" continues to deepen

### **Work Plan for Deepening the "Separation of Permits and Licenses" Reform to Further Stimulate the Development Vitality of Market Entities in Beijing Municipality (Beijing License Notice [2021] No.5)**

*The "Work Plan" clearly states that starting from July 1, 2021, all business-related business licensing items in Beijing will be managed with a full coverage list. According to the four methods of direct cancellation of approval, approval changed to filing, implementation of commitment-based approval, and optimization of approval services, the reform of "separation of permits and licenses" is implemented for enterprise-related operating licensing matters.*

### Business registration

- Business registration, business license application, employee registration, tax-related matters, and bank account opening can **all be handled online**.
- The entire process is "free of charge".
- The average processing time has been reduced to **0.5 days**.
- **Simplified version of notarized documents** can be used for the qualification certificate of non-natural person investors in Hong Kong and Macau.
- To simplify the procedures for the circulation of cross-border public documents, applicants from signatory countries of the Convention Abolishing the Requirement of Legalization for Foreign Public Documents are exempt from submitting consular legalization documentation from the Chinese embassy or consulate in their country of residence.

### Construction permit

- **"Multiple rules in one"**: Enterprises are informed of construction conditions and evaluation requirements in one go, allowing enterprises to "run errands for one time at the most".
- **Construction permits are not required** for projects below a certain scale.
- **"Multiple surveys in one"**: the same subject matter is only surveyed once, the same surveying and mapping item is completed by one unit, and the same surveying and mapping result is only submitted once.
- The **architect responsibility system is implemented** in designated construction projects.
- **Joint acceptance of completion** is promoted.

## Real Estate Registration

- The "One network for full processing" covers all types of businesses, achieving the **electronic registration and licensing of real estate**.
- Non-tax-related procedures, such as property division in divorce, replacement/reissuance of certificates, and transfer of fully taxed properties, **can now be "handled citywide"**.
- **Joint acceptance inspection** of low-risk social investment construction projects, and **simultaneous processing of real estate registration**.

## Government procurement

- **Equal treatment of domestic and foreign-funded enterprises**, and the reserved purchase share of SMEs accounts for more than 40%.
- **The entire process of public bidding is handled online**, and a set of CA certificates are compatible and mutually recognized.
- The supplier qualification condition form review and supporting documentation have been simplified.

## Cross-border trade

- The "two-step declaration" and "declaration in advance" modes realize **efficient customs clearance**.
- Various flexible inspection methods such as appointment inspection, delayed inspection, in-factory inspection, in-storage inspection, etc. have been promoted.
- The "Enterprise Document Storage Box" service function intelligently collects and efficiently manages customs declaration forms, tax refund forms, tax payment forms, contracts, invoices, packing lists, and other documents, which facilitates enterprises to carry out trade credit, cross-border finance, and certification traceability and other businesses.

## Taxation

- Realizing **automatic tax calculation, automatic declaration and online payment** for tax handling and payment.
- Realizing the automatic approval of value-added tax invoices of "**all types, the whole process, and fully online**".
- Providing **free service** for application, issuance, delivery and inspection of electronic invoices.

# INVESTMENT PROCESS

## » Enterprise establishment

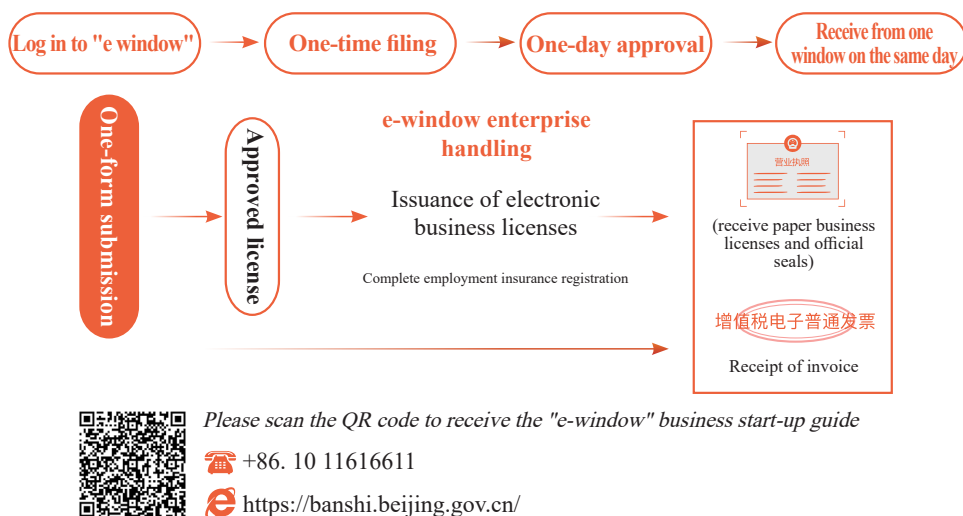

### Application documents

- Original copy of company registration (filing) application
- Original copy of Articles of Association
- Shareholder's qualification documents or natural person identity certification
- Appointment documents and identification documents of legal representatives, directors, supervisors and managers
- Documents for legal use of domicile (business premises)
- Approval documents (license documents)
- Notification of commitment

## Method of application

When an enterprise applies for a business license, it can engrave its official seals for free, and handle tax-related matters, five mandatory social insurances and one housing fund, and opening bank accounts.

- On-site application
- Online application

### Beijing Municipal Administration for Market Regulation Enterprise Start-up Hall

Consultation hotline: 11616611

Address: Island B, 1F, Beijing Municipal Government Service Center, 1 Xisanhuan South Road, Fengtai District, Beijing (southwest corner of Liuli Bridge)

## "Multiple-in-One Report" of enterprise's annual report

The "Multiple-in-One Report" of the original industrial and commercial (market supervision), human and social security, statistics, and customs department annual reports has been realized nationwide. Enterprises shall submit the annual report of the previous year to the market supervision and administration department through the National Enterprise Credit Information Publicity System and publicize it to the public within the specified time limit annually, which can be inquired by any unit or individual.

## Annual foreign investment information report

### Subject of submission

- Enterprises and partnerships directly invested and established by foreign investors in China;
- Foreign (regional) enterprises engaged in production and business activities within the territory of China;
- Foreign (regional) enterprises set up branches in China to engage in production and business activities;
- Enterprises invested and established in China by foreign invested companies, venture capital enterprises and foreign partnership enterprises with investment as their main business.

### Time and method of submission

From January 1 to June 30, log in to the website of the National Enterprise Credit Information Publicity System (Beijing) (<http://bj.gsxt.gov.cn>) to submit the annual report. Relevant data and information can be shared among business, market supervision and foreign exchange departments.

Starting from July 1st, if there are errors or omissions in the annual report, foreign investors or foreign-invested enterprises should apply to the competent commercial department for supplementation or correction through the Foreign Investment Information Reporting Management System (website: <https://wzxxbg.mofcom.gov.cn/>).

### Publicity channels

The foreign investment business information that should be publicized to the public or that the enterprise agrees to publicize will be revealed to the public through the publicity platform of Foreign Investment Information Reporting System ([wzxxbg.mofcom.gov.cn/gspt](http://wzxxbg.mofcom.gov.cn/gspt)) and the National Enterprise Credit Information Publicity System ([www.gsxt.gov.cn](http://www.gsxt.gov.cn)).

### Content of submission

For the content of the annual reports of foreign-invested enterprises, please refer to the Announcement on Matters Related to Foreign Investment Information Reporting (Ministry of Commerce Announcement [2019] No.62)

<http://m.mofcom.gov.cn/article/b/g/202003/20200302943114.shtml>

## » Projects approval and filing

### General projects

For enterprise investment projects other than the "Catalogue of Investment Projects Approved by the Beijing Municipal Government (2018 Version)", filing management shall be implemented.

#### Filing authority

- **Development and Reform Department:** Other fixed-asset investment projects, R&D projects on land of other use, and industrial land where the industrial structure is legally adjusted to cultural and creative, commercial office and other projects, automobiles and other investment projects.

#### Filing information

- Project unit's basic information
- Project name, construction site, construction scale, construction content
- Project's total investment amount
- Project that complies with Industrial Policy Statement

#### Processing time

- The processing time is 0.5-5 working days

#### Handling platform

Please scan the QR code to visit the Beijing Investment Project Online Approval and Supervision Platform

<https://tzxm.beijing.gov.cn/>

Please scan the QR code for details of the application process

<https://tzxm.beijing.gov.cn/gcxm/apply/onlineDetails>

## Declaration of social investment low-risk projects

Beijing implements a "one form" application and acceptance for new low-risk social investment projects. If a foreign-invested project falls within the scope of low-risk projects, project filing shall be handled in accordance with relevant regulations on low-risk projects.

### "One Form" Application and Acceptance

- When the project unit applies for the construction project planning permit, it can simultaneously apply for the project filing;
- When the planning and natural resources department examines and approves the construction project planning permit, the filing authority automatically handles the project filing through the system;
- The filing certificate shall be automatically generated through the system.

Please scan the QR code to get access to the "one-form" acceptance and filing guidelines for social investment low-risk projects  
<https://tzxm.beijing.gov.cn/>

## Approval of foreign investment projects

### Approval authority

- National, municipal and district development and reform departments
- Beijing Economic-Technological Development Area Management Committee
- Beijing Urban Sub-Center Management Committee
- Beijing Daxing International Airport Economic Zone (Daxing) Management Committee, etc

### Application documentations

- Request for project approval (including initial review opinions)
- Project Application Form
- Enterprise registration materials of both Chinese and foreign investors
- Investment Letter of Intent/Resolution of the Company's Board of Directors/Resolution of the Shareholders' Meeting for Capital Increase and M&A Projects
- Effective planning advice

## » **Registration management of resident representative offices of foreign enterprise**

### **Registration authority**

Application for the permanent representative office of a foreign (regional) enterprise should be made to the Market Supervision Administration of the district/city to which the enterprise belongs.

### **Establishment procedures**

- ① "Application Form for Registration (Filing) of Resident Representative Offices of Foreign (Regional) Enterprises".
- ② Foreign (regional) enterprise domicile certificate and legal business certificate that been in existence for more than 2 years. This refers to the main qualification documents or other relevant business certificates that have been issued by the relevant departments of the country or region to which the foreign (regional) enterprise belongs, and which prove that the enterprise has been in existence for more than 2 years.
- ③ Articles of association or organizational agreement of foreign (regional) enterprises.
- ④ Authorization or certification documents for authorized signatories issued by foreign (regional) enterprises.
- ⑤ Appointment documents for chief representatives and representatives of foreign (regional) enterprises.
- ⑥ Credit certificates issued by financial institutions that have business dealings with foreign (regional) enterprises.

The documents in items ① to ⑥ should be authenticated by the notary office and its competent authority in the country or region to which the foreign enterprise belongs, and authenticated by the embassy or consulate of the People's Republic of China in the country (or the region in charge). If the regarding country has no diplomatic relations with China, it should be authenticated by the embassy (consulate) of a third country that has diplomatic relations with China in that country, and then authenticated by the Chinese embassy (consulate) in the third country. Documents issued by overseas territories of certain countries should first be notarized in the territories, then authenticated by the country's diplomatic agencies, and finally authenticated by the Chinese embassy (consulate) in the country. The notarization and certification of relevant documents of representative offices of enterprises in Hong Kong, Macao and Taiwan shall be handled in accordance with current regulations.

*Note: According to the "Convention on the Abolition of the Requirement for Authentication of Foreign Public Documents", starting from November 7, 2023, the relevant embassy (consulate) authentication documents will be replaced with additional certification documents. For those who have already obtained embassy (consulate) authentication documents, the transitional policy can be applied.*

- ⑦ Resume and identification documents of the chief representative and representatives.
- ⑧ Relevant documents on the legal use of the premises where the representative office is located.

⑨ Approval documents from the approving authority. If the business activities of the representative office are required to be approved by laws, administrative regulations or provisions of the State Council, approval shall be obtained.

⑩ If a representative office engaged in profit-making activities is established in accordance with international treaties or agreements to which China has acceded or participated, relevant documents shall be submitted in accordance with the law.

⑪ For the establishment of a representative office, the foreign (regional) enterprise shall announce to the public on the media designated by the registration authority.

⑫ If the financial institution conducting business with foreign (regional) enterprises is a financial institution within mainland China, no notarization or certification is required.

⑬ If the submitted documents are written in a foreign language, a Chinese translation and relevant information of the translation unit or personnel should be provided.

*Note: The above provisions are applicable to foreign enterprises applying to establish non-profit activities related to the business of the foreign enterprise in China in accordance with the "Regulations on the Administration of Registration of Resident Representative Offices of Foreign Enterprises".*

### Annual report

---

Foreign (regional) enterprise resident representative offices shall, between March 1 and June 30 each year, log in to the National Enterprise Credit Information Publicity System (Beijing) (<https://bj.gsxt.gov.cn/index.html>) to submit and complete their annual report procedures.

*Note: In accordance with the Convention Abolishing the Requirement of Legalization for Foreign Public Documents, starting from November 7, 2023, the relevant embassy (consulate) authentication documents have changed to additional certification documents.*

## » Foreign Exchange Administration

### Declaration of International Balance of Payments

The "Regulations on Declaration of International Balance of Payments Statistics" (revised by Order No.642 of the State Council of the People's Republic of China) stipulates that the scope of declaration of international balance of payments statistics is all economic transactions between Chinese residents and non-Chinese residents, as well as the external financial assets and liabilities of Chinese residents. Declaration of international balance of payments statistics is based on the principle of declaration by transaction subjects, and adopts a combination of indirect declaration and direct declaration, and transaction-by-transaction declaration and periodic declaration.

### Foreign exchange management under current account

#### ● Promote the implementation of measures to facilitate cross-border trade

In 2024, the State Administration of Foreign Exchange introduced a number of measures to promote cross-border trade facilitation, including pilot projects for high-level facilitation of cross-border trade, relaxation of net settlement of processing trade receipts and payments, facilitation of foreign exchange settlement of operating lease business of domestic institutions, improvement of cross-border trade funds collection and payment under entrusted agency, and relaxation of the authority to exempt special refunds from registration for goods trade. These measures aim to simplify business processes and optimize foreign exchange management methods, increase convenience and reduce costs for enterprises, so as to further improve the business environment and promote a higher level of opening up.

#### ● Optimize the registration of foreign trade enterprise directory

In order to further improve the level of cross-border trade facilitation, the State Administration of Foreign Exchange continued to deepen the reform of foreign exchange management for goods trade. From June 1, 2024, the directory registration management for foreign trade enterprises has been optimized, with the licensing requirement for the "Directory of Enterprises for Trade Foreign Exchange Receipts and Payments" abolished and replaced by banks collecting enterprise information. After the adjustment of the directory registration management method, when a newly established enterprise handling trade receipts and payments opens a foreign exchange account at a bank, it can handle directory registration procedures and subsequent trade foreign exchange receipts and payments business at the same time, which greatly reduces the labor costs of foreign trade enterprises. This reform measure simplifies the registration process, reduces documentation requirements, and diversifies channels. It therefore achieves the policy goal and addresses the reasonable demands of foreign trade companies to reduce "travel costs."

## Foreign Exchange Management of Capital Projects

---

### ● Foreign exchange management of domestic direct investment

Foreign-funded enterprises may handle foreign exchange registration related to domestic direct investment through banks within their jurisdictions in accordance with the "Business License" issued by the market supervision and management department and other relevant materials.

### ● Facilitation policies under domestic direct investment

◎ Remove restrictions on domestic equity investment in capital of non-investment foreign invested enterprises. Non-investment foreign-funded enterprises are allowed to make domestic equity investment with capital in accordance with the law, under the premise that they do not violate the current Special Administrative Measures for Foreign Investment Access (negative list) and the domestic investment projects are true and compliant.

◎ Implementation of policies to facilitate foreign exchange receipts and payments for capital projects. When eligible foreign-funded enterprises use the foreign exchange income gained from capital, foreign debt, and overseas listings and other capital accounts for domestic payment, they can directly handle it at eligible banks by submitting the "letter of order for payment of foreign exchange income under capital account payment facilitation business" – no need to submit proof of authenticity in advance. Once meeting conditions such as authenticity review and transaction information collection, measures to optimize the facilitation of capital account income payment, such as simplifying the form of documents, may be adopted.

◎ Relax restrictions on the use of foreign exchange settlement of capital account. Remove the restrictions on the use of foreign exchange settlement and use of funds in domestic asset realization accounts. When domestic equity transferors under foreign direct investment receive foreign investors' equity transfer consideration, they can directly handle account opening, fund remittance and foreign exchange settlement procedures at the bank with relevant business registration certificates.

Relax restrictions on the use and settlement of foreign exchange deposits for foreign investors. The foreign investor's foreign exchange deposit from abroad or the deposit from mainland China can be directly used for domestic legal capital contribution and domestic and overseas payment of consideration after the transaction is concluded. Cancel the restriction that the margin account cannot settle foreign exchange, and allow direct settlement and payment of the margin when the transaction is concluded or default deduction.

The RMB funds after the foreign exchange capital of foreign-invested enterprises have been settled can be used as a deposit for the issuance of a bank guarantee.

◎ Domestic reinvestment by foreign-invested enterprises is exempt from registration. If the invested enterprise or equity transferor in a domestic reinvestment transaction is registered in the pilot area, no registration is required for the foreign-invested enterprise receiving the reinvestment.

◎ Facilitate the payment and use of equity transfer funds and overseas listing funds under domestic reinvestment of foreign-invested enterprises. The capital project asset realization account has been adjusted to a capital project settlement account. Domestic equity transferors, including institutions and individuals, can directly remit

foreign currency payments received from domestic entities for equity transfers, and foreign exchange funds raised by domestic enterprises through overseas listings, into the capital project settlement account. Funds within the capital project settlement account can be freely converted into foreign exchange and used independently. Furthermore, domestic equity transferors can directly transfer RMB payments received from foreign-invested enterprises for equity transfers – these payments originating from either direct foreign exchange settlement income or RMB funds in accounts designated for foreign exchange settlement – to their RMB accounts.

#### ● **Facilitation policies under overseas direct investment**

Relax the restrictions on the scale of initial expenses for overseas direct investment. The restriction limiting initial cumulative remittances for overseas direct investment by domestic enterprises to the equivalent of 3 million USD is hereby rescinded. The provision stipulating that cumulative remittances shall not exceed 15% of the total investment amount remains in effect.

#### ● **Cross-border financing management**

◎ The State Administration of Foreign Exchange implements the registration and management of foreign debt contracts signed by non-bank debtors. Foreign-invested enterprises may opt for either the full-caliber mode or the "investment-registered capital difference" mode to conduct cross-border financing business. For non-financial enterprises in Beijing, the contract currency of foreign debt may differ from the currency used for withdrawal and repayment. However, the currency for withdrawal and repayment must be consistent.

◎ To streamline foreign debt management, non-financial enterprises in Beijing can consolidate their foreign debts into one single foreign debt account. After registering a foreign debt contract, non-financial enterprises can handle payments and receipts for the new debt through their existing foreign debt account. This eliminates the need to open a separate account for each newly registered foreign debt, allowing multiple debts to share a single account.

◎ Expand the pilot program of cross-border financing facilitation. Support qualified high-tech, "specialized, refined, unique and innovative" and technology-based SMEs in Beijing to independently borrow up to the equivalent of 10 million USD in foreign debt.

◎ Support the sharing of foreign debt quotas between parent and subsidiary companies in financial leasing. Eligible financial leasing companies in the Beijing region are permitted to share their foreign debt quotas with their established Special Purpose Vehicles (SPVs). If a financial leasing subsidiary's foreign debt quota is insufficient, it can utilize the parent company's unused foreign debt quota.

◎ Foreign exchange registration for certain capital projects can be handled directly by banks. Qualified non-financial enterprises in Beijing borrowing foreign debt or pursuing overseas listings can directly complete the relevant registration procedures at the bank.

◎ Approval for Opening Foreign Debt Accounts in Different Locations is Abolished. Non-financial enterprises with legitimate needs are now permitted to open foreign debt accounts at banks in regions other than the foreign exchange sub-bureau where they are registered.

- **Centralized operation and management of multinational companies' cross-border funds**

After filing with the Beijing Branch of the State Administration of Foreign Exchange, qualified multinational companies can open domestic capital master accounts in banks in Beijing, enabling centralized management of domestic and foreign funds, and handle centralized management of foreign debt and overseas loan quotas, centralized collection and payment of current items, and net settlement of differences.

- **Strengthen the negative list management of capital account income utilization**

The use of capital funds, foreign exchange income under external debt and RMB funds obtained from foreign exchange settlement of non-financial enterprises, must adhere to the principles of authenticity and self-use. These funds are strictly prohibited from direct or indirect use for expenditures forbidden by national laws and regulations. Unless otherwise explicitly stipulated, such funds also prohibited from direct or indirect use for securities investment or other investment and financial management activities (excluding financial products and structured deposits with a risk rating no higher than Level 2). Lending to non-related enterprises is also prohibited, except where explicitly authorized by the business scope and specifically permitted in the following four areas: the Lingang New Area of the China (Shanghai) Pilot Free Trade Zone; the Guangzhou Nansha New Area of the China (Guangdong) Pilot Free Trade Zone; the Yangpu Economic Development Zone of the China (Hainan) Free Trade Port; and the Beilun District of Ningbo City, Zhejiang Province. Additionally, these funds shall not be used to purchase residential properties not intended for self-use, with the exception of enterprises engaged in real estate development and leasing.

### **Policies of Beijing Pilot Free Trade Zone**

---

◎ Optimize the review of current account foreign exchange receipts and payments. Banks are authorized to independently handle the procedures of current account purchase and payment, foreign exchange settlement and transfer in accordance with the three principles of business development.

◎ Enterprises in the Pilot Free Trade Zone engaging in the centralized operation and management of funds of multinational companies, the requirement for the scale of annual domestic and foreign currency international payments has been adjusted from "exceeding 100 million USD" to "exceeding 50 million USD".

◎ Overseas institutions meeting regulatory requirements for spot foreign exchange settlement and sales transactions are eligible, via banks in the Pilot Free Trade Zone, to engage in RMB and foreign exchange derivative transactions.

◎ Banks established and conducting business within the Pilot Free Trade Zone are permitted to manage the settlement of foreign exchange accounts in China for overseas institutions.

*Detailed foreign exchange management regulations and operational guidance can be accessed on the websites of the People's Bank of China ([www.pbc.gov.cn](http://www.pbc.gov.cn)) and the State Administration of Foreign Exchange ([www.safe.gov.cn](http://www.safe.gov.cn)).*

## » Customs procedures

### Customs declaration filing

#### Filing of consignee and consignor of import and export goods, customs broker

- **Enterprises that have not applied for the "Business License"**

The applicant can also check the filing registration of the consignee and consignor of import and export goods when applying for industrial and commercial registration, and fill in the relevant customs filing information (select the "registration area" according to the registered address), and enterprises no longer need to submit paper materials to the customs.

- **Enterprises that have applied for the "Business License"**

After the enterprise uploads the information through the international trade "single window", "enterprise qualification" subsystem or "Internet+ Customs" (select the "registration area" according to the registered address), submitting the application to the local customs departments.

The filing information is announced through the "Credit Publicity Platform of Import and Export Business of Customs of People's Republic of China".

Customs will no longer issue the "Customs Declaration Unit Registration Certificate". If enterprises need to obtain written filing and registration information, they can print the "Customs Declaration Unit Filing Certificate" online through the international trade "single window", and can have it stamped at any customs enterprise management window.

Filing category	Filing location	Handling method	Support hotline
Imported food importer	Food importers should file with the customs at their domicile	Online submission via international trade "Single Window" or "Internet + Customs"	Please call the "12360" customs service hotline to learn more about details
Export food production enterprises	Export food production enterprises shall file with the customs at the place of residence		

## Intellectual property rights protection

### ● Protective measures upon application

If the right holder discovers infringing goods about to be imported or exported and applies for protection from the customs, the customs will detain the goods in accordance with the law, and the right holder shall file a lawsuit with the people's court in accordance with the law.

### ● Protective measures by authority

If customs discovers that imported or exported goods are suspected of infringing on registered intellectual property rights, the rights holder will be notified, and the rights holder can apply for detention. Customs will lawfully detain the goods and conduct investigations. If infringement is confirmed, the goods will be confiscated and fines will be imposed in accordance with the law.

If you need support from the customs to protect your intellectual property rights in the import and export process, please apply to the comprehensive business department of the General Administration of Customs for customs filing:

<http://online.customs.gov.cn/static/pages/treeGuide.html>

## Customs clearance supervision and control

Enterprises may choose from the "one-time declaration" or the "two-step declaration" mode.

### The "two-step declaration" clearance mode

- ① The enterprise can withdraw goods with the approval of the customs after general declaration;
- ② The enterprise has to complete the declaration within the fixed time.

Under the "two-step declaration" customs clearance mode, enterprises are not required to submit all declaration items at once. They can declare separately in two steps: summary declaration and complete declaration.

In the first step, the summary declaration, for goods that do not involve import prohibitions, restrictions, controls, inspections, or quarantine, enterprises only need to declare 9 items and confirm 2 logistics items. For goods that involve import prohibitions, restrictions, controls, inspections, or quarantine, an additional 2 or 5 items should be declared accordingly. Taxable goods require the selection of a qualified guarantee filing number. If the goods do not require inspection, they can be released immediately. If the tax-related goods have submitted a tax guarantee (e.g., consolidated taxation) or have been inspected by customs, they can also be released.

In the second step, the complete declaration, enterprises need to supplement other items and complete the payment of taxes and other customs procedures within the specified time.

For relevant policies, please refer to the announcement of the General Administration of Customs.

## Preferential taxation

### Import tax

Applicable objects	Categories of commodities	Exempted tax types
Foreign investment projects that conform to the encouraged industries in the "Catalogue of Industries for Guiding Foreign Investment" and the "Catalogue of Priority Industries for Foreign Investment in Central and Western China"	The commodities listed in the "Catalogue of Imported Commodities Not Eligible for Tax Exemption for Foreign Investment Projects" and the "Catalogue of Major Technical Equipment and Products Not Eligible for Tax Exemption upon Import", shall be exempted from customs duty	Customs duty
	Technology and supporting components and spare parts imported with the equipment according to the contract	
Foreign-funded research and development centers that meet the conditions listed in the "Conditions for Foreign-funded R&D Centers to Enjoy the Import Tax Policies Supporting Technological Innovation during the 14th Five-Year Plan Period" (Attachment 2 of Cai Guan Shui [2021] No.24) and have been included in the list after being reviewed by the relevant authorities	Import scientific research, technological development, and teaching materials that cannot be produced domestically or whose performance cannot meet the required standards	Import duty, VAT, and consumption tax on imports
<b>Handling department:</b> Zhongguancun Customs, Yizhuang Customs		

### Consolidated tax collection

Customs shall perform consolidated tax collection on taxes payable when eligible taxpayers import goods several times in a short period. On the principle of effective supervision, the customs office implements a policy of "tax collection after customs clearance and consolidated tax collection."

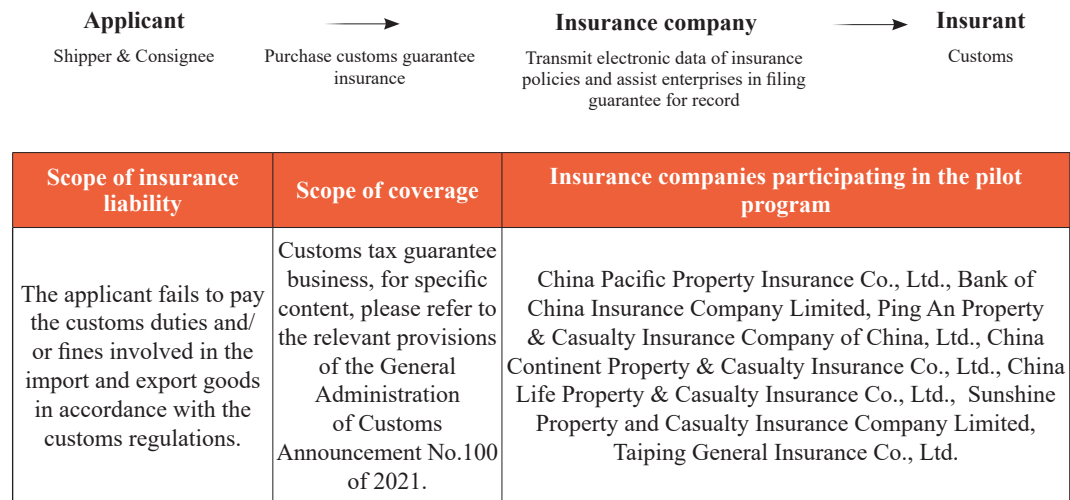

Application conditions: ① Except for "untrustworthy enterprises", all customs-registered enterprises are applicable; ② The applicant enterprise is the consignee and consignor on the import and export declaration; ③ Activate the function of electronic payment of customs duties and fees; ④ Comply with customs tax laws and regulations, meet customs declaration requirements, and pay taxes promptly.

Application method: Enterprises may submit an application for the record-filing of the total amount of guarantee for tax payment to the tariff functional department of the customs directly under the place of registration. The beneficiary of the general guarantee letter should include the customs directly under the place of registration of the enterprise, and other customs directly under the import and export places can be selected according to the needs of the enterprise.

## » Land administration

### Agricultural land conversion and collective land acquisition

If the land occupied by construction involves the conversion of agricultural land to construction land, then the approval procedures for the conversion of agricultural land are required. If it is necessary to expropriate the collectively owned land of farmers for the reason of public interests, the expropriation may be carried out according to law.

### Administration of paid use of State-owned land

Land for business use shall be obtained on the land trading market of Beijing via public bidding, auctioning or listed transactions.

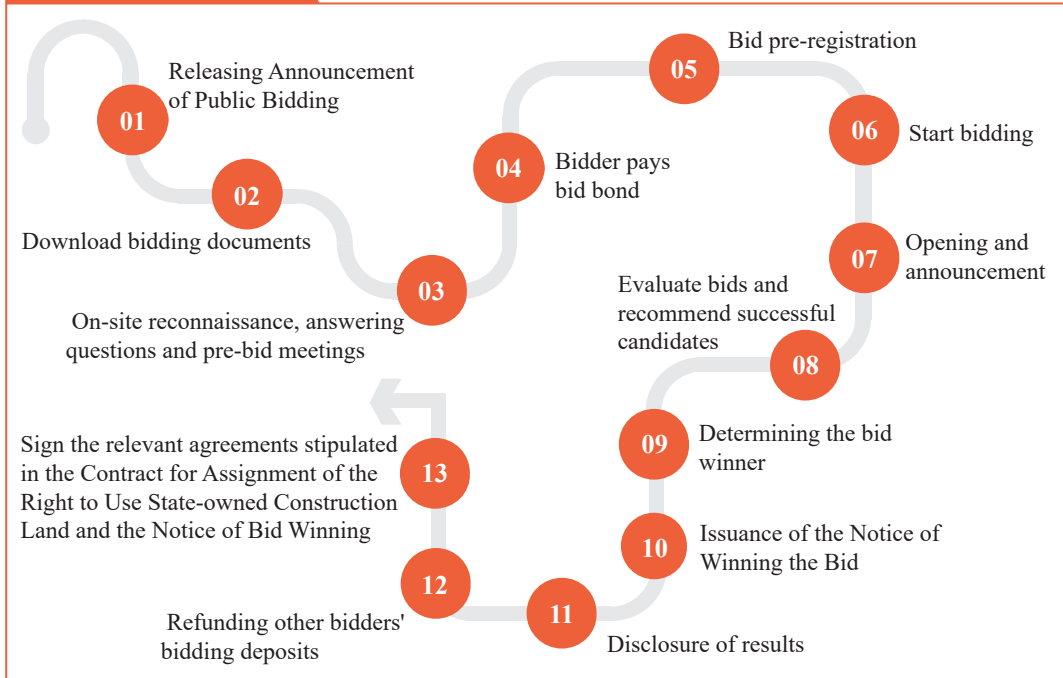

#### Maximum years of transfer of land use rights

Land use	Maximum years of transfer
Land for residence	70 years
Land for education, culture, health or sports	50 years
Land for comprehensive and other uses	50 years
Land for industry, R&D, and warehousing	20 years
Land for business, travel or entertainment	40 years

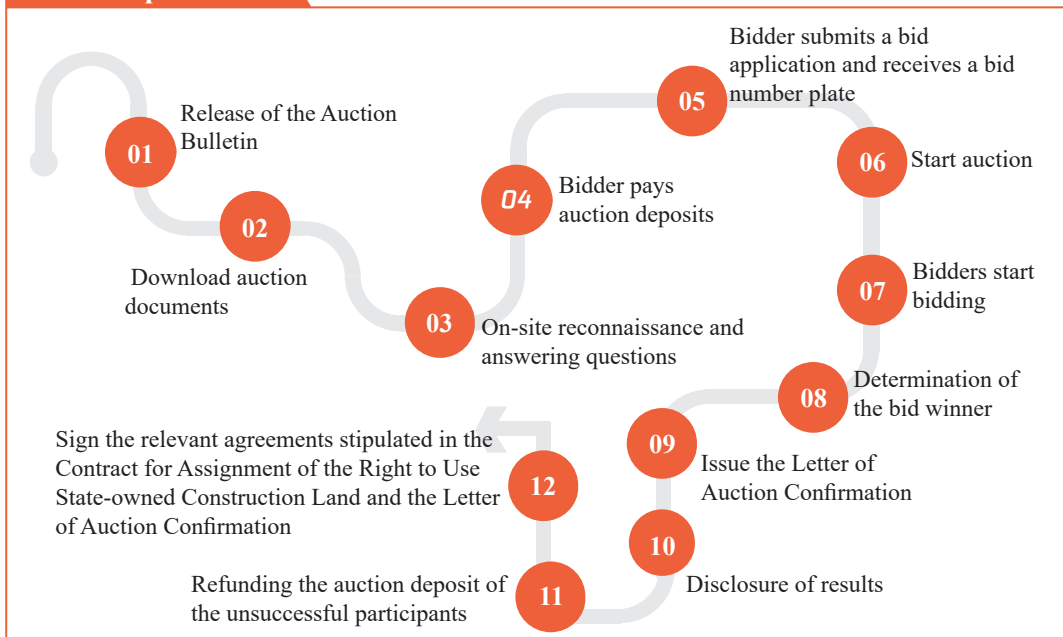

Note: Industrial, R&D, and warehousing land are transferred with a flexible term, and the maximum transfer period is 20 years. For major industrial projects of the state and this city, the term can be extended appropriately with the approval of the municipal government, and the maximum transfer period shall not exceed the legal maximum number of years for the land use right transfer purpose.

## Procedures of transfer of land for business use and State-owned construction land via public bids, auctions or listing

## » Administration of exit and entry

### Flowchart for foreigners coming to China

## Port visa

### Application for port visa

---

Domestic enterprises and institutions that invite foreign nationals holding ordinary passports to enter China for business cooperation, visits and exchanges, investment, or entrepreneurship can apply for a port visa if there is insufficient time to obtain a visa from the Chinese embassy or consulate abroad. In such cases, they should contact the port visa authority by phone to explain the urgent entry needs and request a port visa.

### Types of port visa application

---

Crew visa (C), visit visa (F), business visa (M), short-term private affairs visa (S2, S2 with internship), short-term reunion visa (Q2), talent visa (R), long-term study visa (X1), work visa (Z), group tourism visa declared by travel agencies. Port visas are valid for a single entry, with a maximum stay duration of 30 days.

### Application process for port visa

---

- **Step 1:** Provide application documents. A copy of the foreigner's passport, a letter with a seal issued by the inviting unit, a certificate or statement, etc., should be submitted by email three days before arriving at the port (bjcrjka@nia.gov.cn). In case of an emergency, you may also apply and submit the documents on-site upon arrival.
- **Step 2:** Once the port visa authority has completed the preliminary review, the visa applicant will receive a pre-acceptance form. The visa applicant should take this form to enter the country by flight from abroad.
- **Step 3:** After landing in Beijing, the visa applicant should apply for a port visa at the window of the port visa office.

### Port visa application documentation

---

- **Applying for a visit (F) visa from the Beijing port visa authority:** In addition to your regular passport, the following documents are required: (A) an invitation letter issued by the inviting party in China for the purpose of visiting and exchanging, specifically indicating the urgent need for a port visa application; (B) the business license or other registration certificate of the inviting organization.
- **Applying for a business (M) visa from the Beijing port visa authority:** In addition to your regular passport, the following documents are required: (A) an invitation letter issued by a commercial trade partner in China, stating the urgent reasons for entry; (B) the business license or other registration certificate of the inviting organization.
- **Applying for a work (Z) visa from the Beijing port visa authority:** In addition to your regular passport,

the following documents are required: (A) the "Notice on Work Permit for Foreigners in the People's Republic of China" or "Work Permit for Foreigners in the People's Republic of China" issued by the Beijing Human Resources and Social Security and Foreign Experts Departments; (B) an invitation letter issued by the inviting organization.

- **Applying for a Talent (R) visa at the Beijing port visa authority:** In addition to your regular passport, the following document is required: a high-end talent confirmation letter issued by either the Organization Department of the Beijing Municipal Party Committee or the Beijing Overseas Scholars Center.

**Port visa processing agencies and consultation contacts**

bjcrjka@nia.gov.cn

**Accommodation registration**

According to Article 39 of the "Exit and Entry Administration Law of the People's Republic of China", foreigners who reside or stay in domiciles other than hotels, they or the persons who accommodate them shall, within 24 hours after the foreigners' arrival, go through the registration formalities with the public security organs in the places of residence. If a foreigner changes their residence, they are required to re-register at the police station in their new location within 24 hours.

**Accommodation registration processing method**

Accommodation registration in Beijing can be processed at the household registration office window of the police station in your area. Alternatively, you can register online through the accommodation registration system.

### Accommodation registration documentation

---

Documents that can verify a person's Beijing address include valid entry and exit documents, a property ownership certificate, or a lease contract. If someone else is applying for registration on behalf of the individual, the agent must also submit their valid ID.

### Online accommodation registration system

---

The system supports 6 languages: Chinese, English, Russian, French, Japanese and Korean. You can log in and apply through the following channels:

(A) Follow the "Beijing Public Security Exit and Entry" WeChat public account and directly enter the "Online Accommodation Registration" module from the information guide

(B) Apply via the international version of the Beijing Municipal Government Portal

<https://english.beijing.gov.cn/livinginbeijing/>

(C) Apply by entering the URL in the browser

<https://zwfw.gaj.beijing.gov.cn/zsdj/zsdj-q/>

## Visas for foreigners

The Beijing Municipal Public Security Bureau Exit and Entry Administration is responsible for the extension, renewal, and reissuance of visas for foreigners, as well as the issuance, renewal, and reissuance of stay permits and residence permits.

The types of visas processed include L visa (tourism), F visa (visit), M visa (trade), S2 visa (short-term private affairs), Q2 visa (short-term reunion), R visa (talent), X2 visa (short-term study), J2 visa (temporary journalist), C visa (crew), etc.

The types of stay permits include visa-free entry, those who need to stay in Beijing beyond the visa-free period for non-diplomatic and official reasons; those who need to stay in Beijing after approval to renounce Chinese nationality; those who need to continue to stay in Beijing for humanitarian reasons after the termination of their residence permit; and foreign babies born in China.

The types of residence permits fall into five categories: work, study, journalism, family reunion, and private affairs.

### Online application

---

Foreign newborn babies born in Beijing can apply for residence permit registration online.

Visa document acceptance email: [bjcrj-wq@nia.gov.cn](mailto:bjcrj-wq@nia.gov.cn)

### Permanent residence for foreigners

According to the Exit and Entry Administration Law of the People's Republic of China, the Measures for the Administration of the Examination and Approval of Permanent Residence of Foreigners in China and other relevant laws and regulations, foreigners applying for permanent residence in China shall meet the basic conditions of abiding by Chinese laws, being in good health, having no criminal record, and fulfilling specific classification criteria such as being investors who meet certain investment thresholds in China, high-level talents employed in the country, individuals in special need by the state, those who have made significant contributions to China, and family reunion cases. Applications must be submitted to the Exit and Entry Administration Bureau of the Municipal Public Security Bureau or the District Public Security Bureau. Upon approval by the National Immigration Administration, successful applicants will receive the legal identity document known as the "Foreigner Permanent Residence Identity Card" (also referred to as the "Five-Star Card").

Foreigners who have obtained permanent residence status in China are not limited in their duration of stay. They may enter and exit the country using their passports and permanent residence permits, which also allow them to live and work in China. These permanent residence permits can be used independently for various matters, including finance, education, healthcare, transportation, accommodation, communication, employment, taxation, and social insurance.

### Investment-related Applications

---

- Individual direct investment in the encouraged industries listed in the "Guidance Catalogue of Foreign Investment Industries" amounts to more than 500,000 USD (actual paid-in registered capital), maintained stable investment conditions and a good tax record for the three consecutive years prior to the application date, and has established a foreign-invested enterprise in Beijing, with the "Foreign-Invested Enterprise Approval Letter" indicating the applicant's name in the investor section;
- Individual direct investment totaling more than 2 million USD (actual paid-in registered capital), maintained stable investment conditions and a good tax record for the three consecutive years prior to the application date, and has invested by establishing a foreign-invested enterprise in Beijing or through joint

petroleum exploration and development with Chinese investors, and has established a foreign-invested enterprise in Beijing, with the "Foreign-Invested Enterprise Approval Letter" indicating the applicant's name in the investor section.

### Job-related Applications

---

- Individuals serving as deputy general manager, deputy factory director or above, or holding associate senior titles such as associate professor, associate researcher or equivalent senior professional titles, in enterprises and institutions implementing national key projects or major scientific research projects, as well as seven types of scientific research institutions such as national laboratories, national key laboratories, national engineering laboratories, national engineering research centers, national recognized enterprise technology centers, national engineering technology research centers and foreign-invested R&D centers, and employees enjoying the same benefits;
- Individuals serving as deputy general manager, deputy factory director or above, and employees who enjoy the same benefits in high-tech enterprises, encouraged foreign-invested enterprises, foreign-invested advanced technology enterprises or foreign-invested product export enterprises;
- Individuals holding positions such as professors, associate professors or employees enjoying the same benefits key higher education institutions in Beijing;
- Chinese of foreign nationality who have worked in Zhongguancun enterprises for 4 consecutive years and have resided in China for no less than 6 months each year;
- Chinese of foreign nationality who have worked continuously for 4 years in enterprises participating in the comprehensive pilot program for expanding the opening-up of the service sector in Beijing, and who have resided in China for a cumulative total of no less than 6 months each year;

## 16 policies of "Setting Sail • Assisting Enterprises"

---

- **Policy 1:** For key enterprises requiring business filing in Hong Kong and Macau, the policy provides conveniences such as no restrictions on the number of individuals for filing and exemption from tax certificates. Additionally, enterprises may apply for 1-year multiple-entry business endorsements for employees who need to travel to Hong Kong and Macau at any time.
- **Policy 2:** Facilitate the application process for talent visas for enterprises traveling to Hong Kong and Macao. The six types of talents working in enterprises can apply for multiple-entry talent visas to Hong Kong and Macao with a validity period of 1 to 5 years, either individually or collectively, with relevant talent certificates. Each stay in Hong Kong or Macao is limited to a maximum of 30 days at a time.
- **Policy 3:** Provide port visa convenience for foreigners entering China for urgent needs. Foreigners who urgently need to come to China for business, visits, or work can apply for visit, business, or work visas at the port visa authority respectively.
- **Policy 4:** Facilitate the application of re-entry visas for foreign nationals. Foreigners invited by enterprises to China for business negotiations, scientific research exchanges, project collaborations, and other activities who require multiple entries can apply to the exit-entry administration department of the public security authority for a multiple-entry visit or business visa using an invitation letter and other relevant documents.
- **Policy 5:** Facilitate the issuance of private affairs visas with "internship" annotations for foreign students invited by enterprises. Those from overseas universities invited by enterprises for internships in China can apply a short-term private affairs visa with the "internship" annotation from the port visa department. Additionally, foreign students invited to Beijing for internships can apply for a private affairs visa ("internship") from the exit-entry administration department of the public security authority. This visa is valid for one year for internship activities, provided that applicants include an invitation letter and their university enrollment certificate.
- **Policy 6:** Support foreign students to "work-study" in enterprises. Under the organization and management of their universities, foreign students may use their spare time to obtain legal remuneration through labor in enterprises to improve their learning and living conditions. When foreign students engage in off-campus work-study activities, their colleges and universities should formulate relevant regulations and file them with the Municipal Education Commission. Enterprises should assist foreign students in applying for residence permits with "work-study" related information from the entry-exit management department.
- **Policy 7:** Facilitate foreign talents in enterprises to receive continuing education. Foreign management and professional and technical talents working in enterprises can pursue degrees and continuing education at domestic universities without needing to change their residence permits.
- **Policy 8:** Facilitate part-time entrepreneurship for foreign talents working in enterprises. Foreign high-level professionals can work part-time for innovation and entrepreneurship, provided they have the consent of both their primary and part-time employers, and after filing with the exit-entry administration of the

public security authorities, may engage in part-time innovation and entrepreneurship.

- **Policy 9:** Provide visa convenience for foreign relatives of enterprise employees. Foreign relatives visiting or reuniting with employees in Beijing can apply for a residence permit with a maximum stay of up to 5 years. For extensions or reissuance of short-term visit and reunion visas, a domestic inviter's statement of kinship may be used in place of a kinship certificate.
- **Policy 10:** Provide entry and residence convenience for foreign talents in enterprises. Foreign professionals can apply for talent visas at the port visa authority with the "Confirmation Letter of Foreign High-end Talents", and their accompanying family members can apply for private affairs visas. Those entering with talent visas, along with their families, will be provided with work residence and long-term residence conveniences.
- **Policy 11:** Facilitate cross-regional job adjustments for foreign talents in enterprises. Foreign management and professional personnel who change positions across regions within their companies do not need to reapply for residence permits, provided they submit filing to the exit-entry administration department of the public security authority.
- **Policy 12:** Foreigners who apply for residence permits do not need to retain their original passports after verifying their valid passports in accordance with regulations, allowing foreigners to handle other necessary matters with their passports during this period.
- **Policy 13:** Foreigners who meet the investment standards and satisfy relevant conditions can apply for permanent residence in Beijing.
- **Policy 14:** Foreign employees employed by enterprises with doctoral degrees from domestic and foreign universities can apply for permanent residence in China.
- **Policy 15:** Provide convenient online accommodation registration services. In addition to registering in person at the police station of the public security agency, foreign employees who reside in the community can also register their accommodation through the "Beijing Public Security Exit and Entry" WeChat official account, the international version of the Beijing Municipal Government website, or by scanning QR codes and using other online channels, allowing for zero in-person visits and on-demand processing.
- **Policy 16:** The "Setting Sail" special window for exit and entry services. Both Chinese and foreign employees of enterprises can take advantage of the "Setting Sail" special window located in 21 foreigners' exit and entry service halls throughout the city, enjoying convenient measures such as no appointments required, no queues, and flexible documentation, and expedited processing.

## » **Labour and social security**

### **Labour employment**

#### **Recruitment**

If a foreign-invested enterprise recruits the registered unemployed workers in the city, those who enter the human resources market for the first time and personnel from Hong Kong, Macao and Taiwan, it shall, within 30 days from the date of recruitment, go through the employment registration formalities with the social security office of the street (township) where the company is registered or operated. The employment registration and social insurance participation registration shall be handled together, and the employment registration information shall be subject to the social insurance participation registration information, and shall not be handled separately.

When hiring foreign talents, employers can handle the entire process of applying for, renewing, updating, or canceling work permits online through Service System for Foreigners Working in China (hereinafter referred to as the Working in China System). Foreigners are no longer required to possess a physical work permit upon entering China. For those who already hold a physical foreign work permit, the principle of "no change, no replacement" applies. When applying for an extension or update of the existing work permit, please follow the new integrated card-based procedure.

Download application documents: Beijing Overseas Scholars Center website (<https://www.bjhwxr.gov.cn/>).

#### **Recruitment and recommendation services**

The Beijing employment service center of the Talent Service Center provided recruitment registration service for foreign-funded enterprises (including Hong Kong, Macao and Taiwan-funded enterprises) and recommended talents for empty positions registered.

*Please scan the QR code to get access to the recruitment registration service*

<http://fuwu.rsj.beijing.gov.cn/jycy/jycs/index.html>

#### **Personnel file management services**

Foreign-funded enterprises had been archived in Beijing Talent Archives Public Management Service Center of the Beijing Talent Service Center, with collective archives.

Wage standards

Minimum Wage Standard of Beijing Municipality	
Full-time employees	No less than 2420 yuan per month
Part-time employees	No less than 26.4 yuan per hour; No less than 62 yuan per hour (statutory holidays)

Social insurance

Social Insurance Rate of Beijing Municipality

Item	Paid by Employers	Paid by Employees	Payment Base
Basic endowment insurance	16%	8%	For urban employees: average monthly salary in the previous year. For employers: the sum of payment bases paid by all urban employees
Unemployment insurance	0.5%	0.5%	Average salary of employees of the employer in the previous year
Employment injury insurance	0.2%-1.9% (rates are determined according to the type of the employer unit)	N/A	Total wages of all employees
Basic medical insurance (including maternity insurance)	9.8%	2%+3 yuan	For urban employees: average monthly salary in the previous year. For employers: the sum of payment bases paid by all urban employees

### Handling method of newly established enterprises

---

◎ Register through the "e-window" platform to manage the enterprise's social insurance registration simultaneously. After filling in the enterprise information and submitting it, the system will promptly complete the social insurance registration.

◎ Log in to the "e-window" platform and click on "personal service" to access the online service page. You can directly fill in the employee information while applying for the establishment of the enterprise. Once the review is approved, it will take effect immediately, and the social insurance registration will be completed.

◎ Log in to the Beijing Social Insurance Online Service Platform and click on the "Unified Registration for Social Insurance, Employment, and Labor Employment Filing" module to facilitate information sharing and coordinated registration for all three services.

Foreigners who participate in social insurance and meet the required conditions are eligible to enjoy social insurance benefits in accordance with the law. Those who leave China before reaching the eligible age for receiving pensions will have their personal social insurance accounts retained. If they return to work in China, benefits will be paid cumulatively. If the applicant prefers to terminate the social insurance relationship by submitting a written application, the amount in their personal social insurance account may be paid to them as a lump sum.
